President's Greetings

Greetings,

This is Chang, Won Sam, the 14th president of KOICA.

Since its establishment in 1991, KOICA has served as a global development cooperation organization that pursues universal values and inclusive growth. We have contributed to the peace and prosperity of the international community by implementing diverse development cooperation projects.

Amid rapidly changing global circumstances, the Republic of Korea has continuously expanded its Official Development Assistance (ODA), shared its unique development experience with the international community, and is striving to play a bridging role connecting the Global South and North.

In order to navigate the growing global complex crises of today, it is necessary to adapt flexibly to the changing environment while strengthening global solidarity and cooperation. As Korea's representative development cooperation agency, KOICA will continue to communicate and collaborate with diverse development cooperation partners including government organizations, businesses, and civil society based on our accumulated expertise and high standard of transparency.

I ask for your continued interest and support. Thank you.

President, Korea International Cooperation Agency (KOICA)

CHANG, Won Sam

장원삼

Korea International Cooperation Agency

KOICA Who We Are

1 Objectives

Established in April 1991, the Korea International Cooperation Agency (KOICA) has grown to become the representative development cooperation organization of Korea. Through our projects, we aim to reduce poverty and enhance quality of life in developing countries; improve the rights of women, children, and people with disabilities; realize gender equality; achieve sustainable devel-

opment; advance economic cooperation and fellowship with partner countries; and contribute to peace and prosperity in the international community

2 Management Objectives

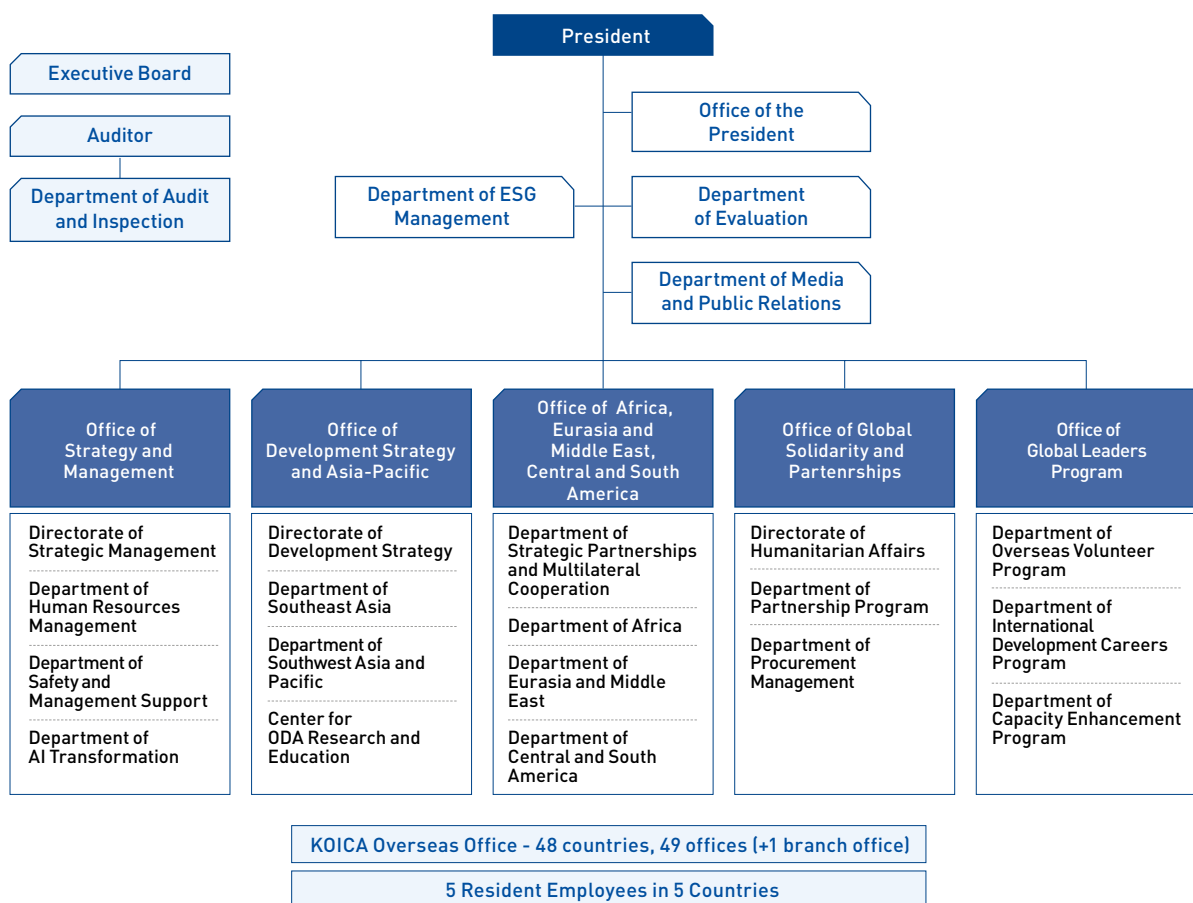

Strategic System of Medium and Long-term Management Goals				
Mission	Contribute to common prosperity of humanity and promotion of world peace through inclusive, co-prosperous development cooperation			
Vision	Leading global development cooperation organization that pursues universal values and co-prosperity Inspiring Hope / Accelerating Growth / Elevating Pride / Delivering Results			
Core Value	[SDGs 5P] People · Peace · Prosperity · Planet · Partnership			
Management policy	Future-oriented / Communication-driven / Efficiency-based / Accountability-focused			
Strategic goals	Target 7th place among donor in terms of contribution to SDGs	Raise 1.3 billion USD in development cooperation partnership finance	Cultivate 120,000 development cooperation professionals	Achieve highest standards in public sector ESG management index
Strategy direction	Promote achievement of Sustainable Development Goals (SDGs)	Bolster development cooperation partnership	Enhance sustainability of development ecosystem cooperation	Advance ESG and Innovative management
16 Major Strategy Assignment	1.1. Enhance green and digital innovation in partner countries 1.2. Support sustainable economic growth in partner countries 1.3. Reinforce social infrastructure in partner countries 1.4. Respond to global humanitarian crises and enhance resiliency	2.1. Strengthen foundation for integrated development cooperation 2.2. Advance mutual growth with private companies 2.3. Reinforce civic society cooperation 2.4. Diversify global partnership	3.1. Strengthen foundation for job creation in development cooperation 3.2. Cultivate development cooperation professionals with field experience 3.3. Strengthen ecosystem to foster key talent from partner countries 3.4. Strengthen development cooperation knowledge-sharing and feedback system	4.1. Practice safe and sustainable environmental management 4.2. Implement outcome-oriented, efficient organizational operations 4.3. Implement ethics-based accountable management 4.4. Enhance communication and engagement with stakeholders

3 Organization

KOICA established the following management objectives: future-oriented, two-way communication, and efficiency. In order to effectively implement our objectives, KOICA's organizational structure consists of: the Office of Strategy and Management; Office of Development Strategy and Asia-Pacific; Office of Africa, Eurasia and Middle East, Central and South America; Office of Global Solidarity and Partnerships; Office of Global Leaders Program.

Headquarters	5 executive directorships, 3 senior directorships, 24 departments, 2 centers, 37 teams
Overseas Offices	48 countries, 49 offices (+1 branch office)
Resident employees	5 resident employees in 5 countries -Permanent Delegation of the Republic of Korea to the OECD , Permanent Mission of the Republic of Korea to the UN, Permanent Mission of the Republic of Korea in Geneva, Embassy of the Republic of Korea in India, Embassy of the Republic of Korea in Belgium

Organizational chart

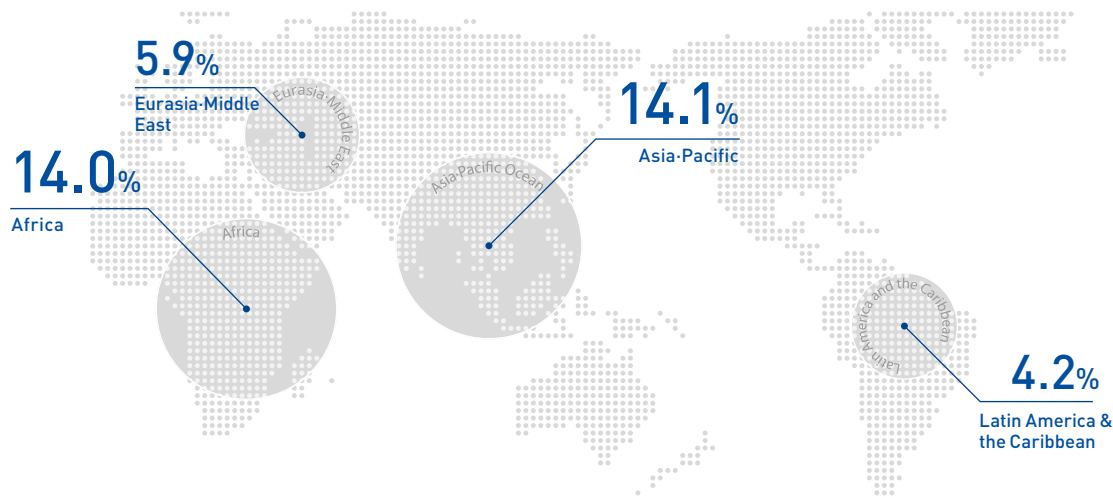

4 Scale of Support

KOICA is responsible for 28.2% of Korea's total Official Development Assistance (ODA) under the 2026 Comprehensive Strategy for International Development Cooperation and executes 61% of the country's grant-based ODA. As Korea's dedicated agency for grant aid development cooperation, KOICA's support budget has significantly expanded from 17.4 billion KRW in 1991 to 1 trillion 532.2 billion KRW in 2026, based on total expenditure estimates.

Regional Allocation

Our support for Africa is increasing continuously in line with government policy accounting for 24.6%. Asia also has been a traditional priority region for KOICA's development cooperation.

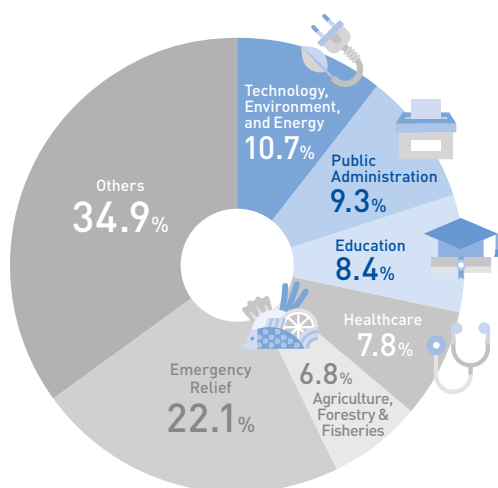

* Others: Includes budgets for overseas volunteers, fellowship program, public-private partnership, administrative expenses, etc.

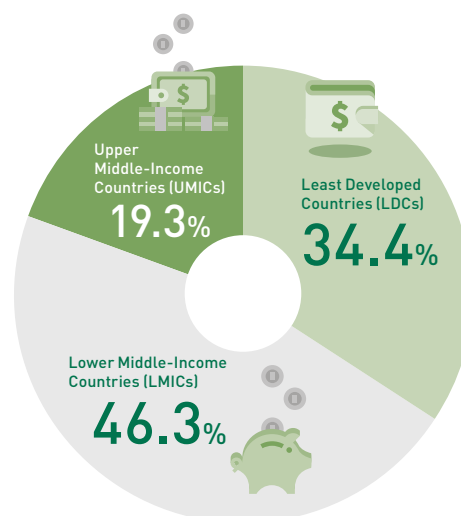

Allocation by sector

KOICA has adopted 5 key sectors (technology, environment & energy; public administration; Healthcare; education; agriculture & fishery), reflecting Korea's comparative advantages for effective and impactful support. These sectors are also in accordance with UN SDGs and development priorities of developing countries.

Allocation by Income Level

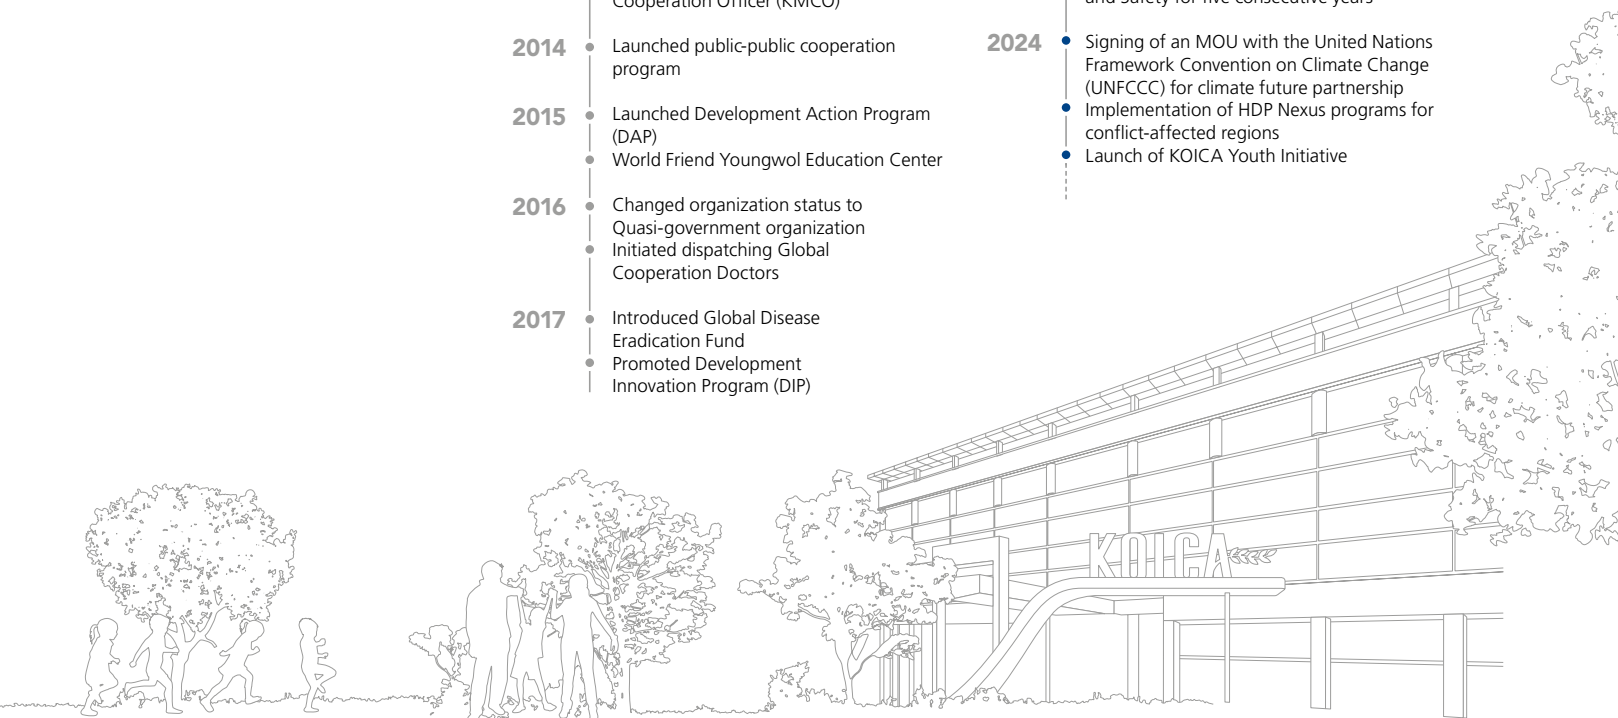

In 2026, 34.4% of KOICA's country program budget is allocated to Least Developed Countries (LDCs)

History

HISTORY

- 1991**
 - Established Korea International Cooperation Agency
- 1995**
 - Initiated NGOs cooperation program
- 2002**
 - Started Peace building program in Afghanistan
- 2003**
 - Started Peacebuilding program in Iraq
- 2004**
 - Disaster relief & rehabilitation support during the tsunami in South Asia
- 2007**
 - Enacted the 'International Emergency Relief Act,
 - Launched Global Poverty Eradication Contribution Program
- 2008**
 - Launched EACP (East Asia Climate Partnership) Program
- 2009**
 - Launched WFK (World Friends Korea), the integrated brand of the Korean government's volunteer program
- 2010**
 - Opened KOICA Global Village and ODA Education Center
 - Hosted the 1st 'Development Cooperation Day, Ceremony
- 2011**
 - Integrated the Korean government's volunteer program budget to KOICA
 - Launched ODA Young Professional Program
- 2012**
 - Initiated development partnership program with universities
 - Launched KOICA Development Consulting Program (DEEP)
- 2013**
 - Initiated the Global Youth Development Program
 - Initiated dispatching KOICA Multilateral Cooperation Officer (KMCO)
- 2014**
 - Launched public-public cooperation program
- 2015**
 - Launched Development Action Program (DAP)
 - World Friend Youngwol Education Center
- 2016**
 - Changed organization status to Quasi-government organization
 - Initiated dispatching Global Cooperation Doctors
- 2017**
 - Introduced Global Disease Eradication Fund
 - Promoted Development Innovation Program (DIP)
- 2018**
 - Reformed management system (new midterm management strategy, re-organization)
 - Launched job creation strategy based on the career development ladder
 - Set up 'Council for Korea Development Cooperation Program,
- 2019**
 - Launched KOICA Implementation Plan of the ASEAN-ROK Future Community Vision
 - Signed a development cooperation MOUs with five ASEAN countries on 2019 ASEAN ROK Commemorative Summit in Busan
 - Launched SDG 5-13-16 midterm implementation strategies
 - Established a subsidiary company, Koworks
- 2020**
 - Launched ABC program
 - Launched KOICA Program Steering Committee
 - Launched KOICA Human Rights-based Development Implementation
- 2021**
 - Reformed mid- to long-term management objectives, vision, value system on occasion of 30th anniversary of KOICA's establishment
 - Became Accredited Entity of Green Climate Fund (GCF)
 - Provided COVID-19 vaccines to 92 countries through COVAX global initiative
- 2022**
 - Selected among top 3 bilateral donors in Aid Transparency Index (ATI)
 - Korea Disaster Relief Team (KDRT) earns WHO Emergency Medical Team Type 1 Fixed classification
- 2023**
 - First launch of the KOICA-USAID Climate Crisis Joint Response Initiative
 - Grand Prize winner of Korea's ESG Management Innovation Awards
 - Top rating for public data provision and operations by the Ministry of the Interior and Safety for five consecutive years
- 2024**
 - Signing of an MOU with the United Nations Framework Convention on Climate Change (UNFCCC) for climate future partnership
 - Implementation of HDP Nexus programs for conflict-affected regions
 - Launch of KOICA Youth Initiative

Africa

Implementation of Diverse, Tailored Projects Based on the Africa Regional Cooperation Strategy

KOICA is carrying out customized cooperation projects tailored to the regional environment and specific national needs across Africa. In alignment with the 'Korean government's Direction for Grant Aid Projects in Africa' and 'Development Cooperation Strategy for Africa,' KOICA aims to enhance effectiveness through integrated grant and concessional aid support. Additionally, by scaling up projects KOICA is working to maximize impact. In particular, KOICA is actively identifying new projects based on both the Korean government's commitment to provide USD 10 billion in ODA—as discussed during the first Korea-Africa Summit in 2024—and the development needs of partner countries. Furthermore, by focusing on key partner countries and projects areas, KOICA seeks to establish a mutually beneficial partnership for sustainable development in Africa.

Project for Comprehensive Primary Healthcare Strengthening in Two Regions of Northern Ghana (2022–2027 / 12.4 million USD)

Background

The Ghanaian government has set a goal of providing its citizens with high-quality essential healthcare and public health services by 2030. In response, KOICA is working to support universal health coverage (UHC) in Ghana by building on the achievements of Ghana's Regional Health System Strengthening Project (2016–2022). To this end, KOICA is implementing the project in collaboration with the Ghanaian Ministry of Health and trilateral cooperation between Korea, the U.S., and Japan. This project is being carried out as a Program-Based Approach (PBA) initiative, where the Ghana Health Service directly executes the tasks. The project aims to enhance community-based primary healthcare systems, improve maternal and child health, and ultimately contribute to universal health coverage in Ghana. The project's target area has been expanded from the Upper East Region to the North East Region, with ongoing activities including capacity building for healthcare personnel, improvement of healthcare facilities, and strengthening of health information systems.

KOICA's Role

Strengthening community participation and support for primary healthcare

Enhancing maternal and child healthcare capacity of medical personnel

Improving healthcare facilities and health information systems

Achievements

- Expected to benefit approximately 1.04 million vulnerable residents in Ghana's Upper East Region
- Capacity building for 900 healthcare professionals to strengthen the healthcare system

Rwanda Sustainable Agricultural Productivity and Market Linkage (SAPMP) project (2020-2026 / 10 Million USD)

Background

More than 70% of Rwanda's land is mountainous, and similar to Korea, it has an unfavorable environment for agriculture. In spite of this environment, about 70% of the total population depend on subsistence farming for their livelihood, but low agricultural productivity leads to a high poverty rate of over 40% in rural areas. Accordingly, KOICA is carrying out projects in cooperation with the Rwanda Ministry of Agriculture to support building Rwanda's agricultural infrastructure, strengthening farmer's organizational capabilities, market access, and increasing the added value of agricultural products by utilizing our agricultural development experience. KOICA expects to contribute to resolving poverty in Rwanda's agricultural population in the long term through this project.

KOICA's Role

"Strengthening the value chain" by strengthening the organizational capacity of farmers, distribution of agricultural products and strengthening marketability

Strengthening farmers' organizational capacity

Five new farmers' organizations were established to activate contracts between farmers and buyers through the farmers' organizations, and to support the sales and marketing of agricultural products to strengthen the capabilities of farmers.

Increasing the added value of agricultural products

We aim to increase the added value of agricultural products by ensuring that more than 80% of agricultural products produced by wetland farms and 70% of agricultural products of steep land farms are sold at the market

Asia-Pacific

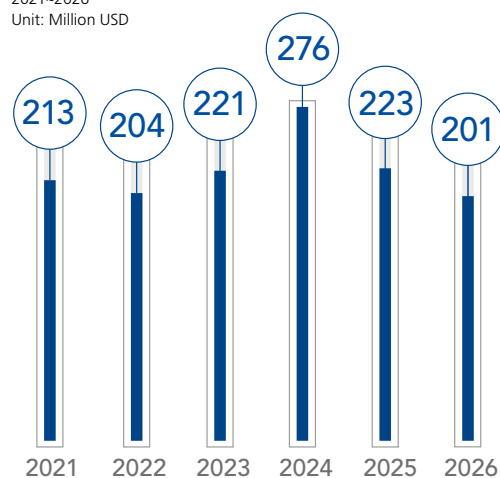

Promoting Cooperative Projects to Strengthen Partnerships in the Asia-Pacific Region

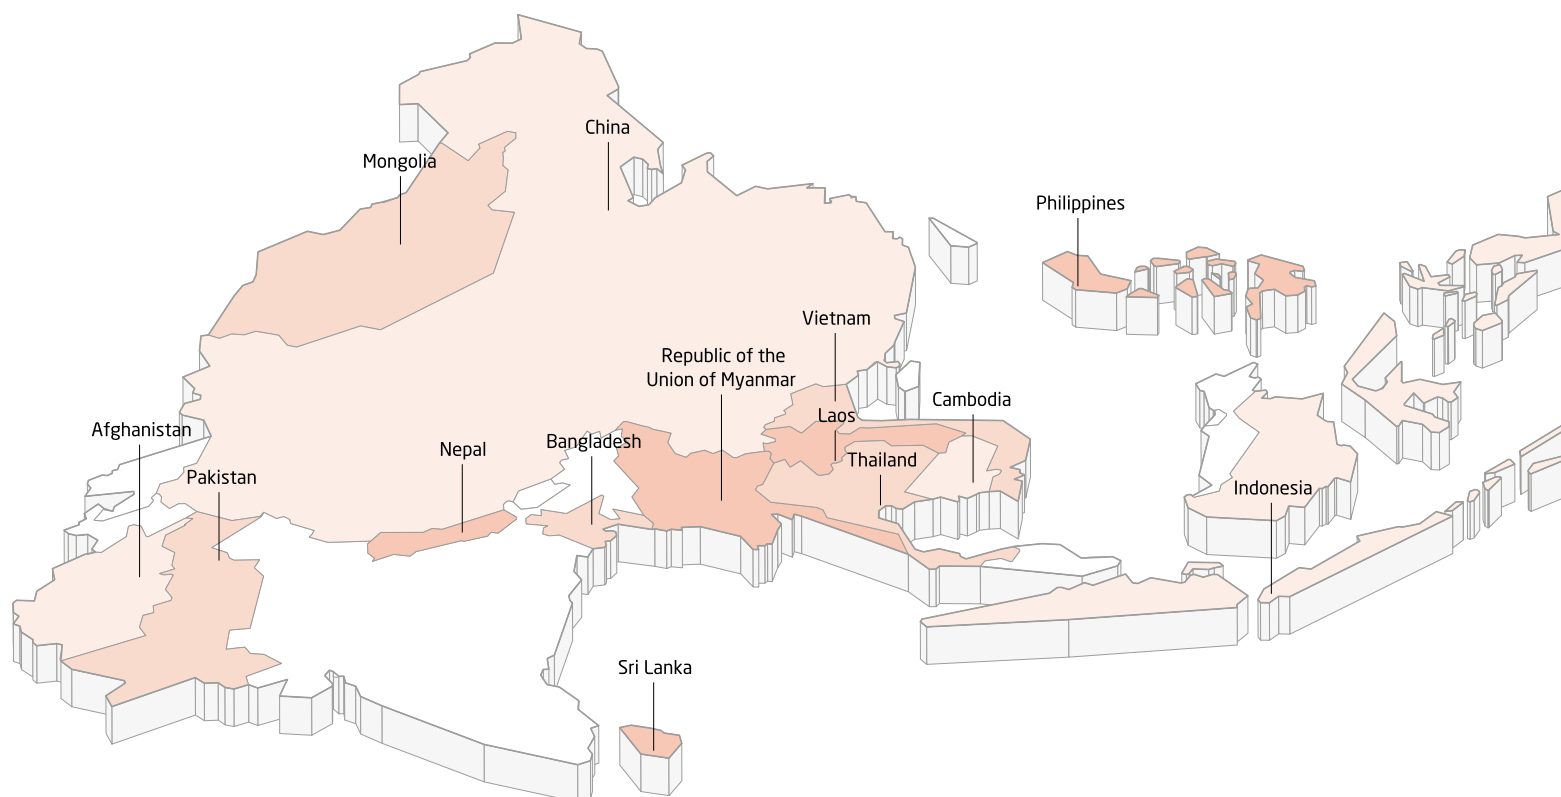

The Asia-Pacific region, geographically close and culturally connected, is a strategic area for KOICA's support. In alignment with the Korean government's Indo-Pacific Strategy and the Korea-ASEAN Solidarity Initiative, KOICA is strengthening core areas of cooperation by expanding digital ODA infrastructure and deepening climate change response efforts. To lay the foundation for shared prosperity and sustainable development, KOICA has designed specialized programs for Asia, including industrial talent development and science and technology initiatives. In ASEAN countries Vietnam and the Philippines, KOICA primarily supports higher education, rural development, and urban development. In Northeast Asia, the focus is on digital public administration and rural development, while in Southwest Asia, efforts center on promoting the rights of vulnerable populations and enhancing digital public administration. Meanwhile, in the Pacific region, KOICA is prioritizing climate change response projects.

Establishment of IT-based Job Incubation Center in Cambodia (2019–2024 / 7.91 million USD)

Background

The Cambodian government is pursuing industrial diversification to achieve its goal of becoming an upper-middle-income country by 2030. As part of this initiative, it emphasizes the development of a skilled workforce equipped with the technical expertise and competencies required by the market. In particular, Cambodia regards the IT sector as a catalyst for industrial advancement. In response, KOICA is supporting the Cambodian government's efforts to foster an IT industry ecosystem by introducing an industry-academia-linked incubation model. Through this initiative, KOICA aims to strengthen IT cooperation between Korea and Cambodia while contributing to the sustainable development of Cambodia's IT sector.

KOICA's Role

Contributing to Cambodia's national competitiveness by promoting industrial diversification and high-value-added industrial development through the establishment of a technology and startup ecosystem.

Establishment of the National Incubation Center of Cambodia (NICC) at the Royal University of Phnom Penh

By establishing a startup incubation system that includes training professionals in startup and developing technology startup programs, KOICA is strengthening the linkage between academia and industry demand.

Establishing and operating a startup ecosystem community in Cambodia

Facilitating entrepreneurship exchange activities between Korean and Cambodian universities

Vietnam Korea Institute of Science and Technology (V-KIST) Establishment Aid Project (2014-2023 / 35 million USD)

Background

Vietnam is strengthening its capabilities in science technology and research to prepare for the 4th Industrial Revolution. As the Korea Institute of Science and Technology (KIST) played an important role in the development of science technology in Korea in the past, V-KIST aims to serve as an industrial technology-based research center that meets the demands of the country. The Vietnamese government evaluates this project as a launching pad for reform in terms of R&D as well as its National Innovation System (NIS).

KOICA's Role

Contribute to KOR-VIET mutual prosperity by sharing Korea's science technology

Support KIST Establishment

Vietnam Korea Institute of Science and Technology

Implement establishment support project

Supporting Vietnam's endeavors to establish a research institute that can lead future advancements in technology and develop the capacity of human resources

Transfer Korea's Development Experience

Korea's National Science Technology
Transfer Development Experience

Sharing Korea's experience accumulated in science and technology, along with knowhow of the operation of KIST, with Vietnam KIST

Eurasia· Middle East

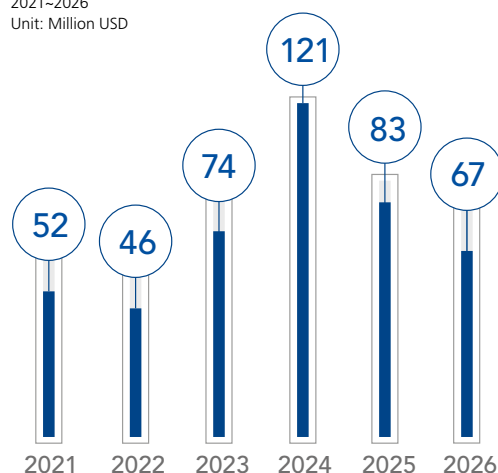

Realizing Mutual Cooperation for Peace and Prosperity in Eurasia and the Middle East

The Eurasia and Middle East regions are rich in natural resources, yet many countries face significant challenges, including conflicts, terrorism, political instability, and fragile governance systems. Additionally, some nations struggle with insufficient infrastructure and inadequate living conditions due to harsh environments. In Central Asia, KOICA is actively supporting economic and social development in partner countries by promoting industrial diversification and human resource development. Simultaneously, KOICA is working toward establishing transparent and efficient governance systems to foster sustainable growth. In Ukraine, which was newly designated as a priority partner but has been facing a prolonged war since 2022, KOICA is making swift efforts to provide assistance in various sectors through the Ukraine Peace Solidarity Initiative and its CPS. Meanwhile, in the Middle East, KOICA is committed to enhancing economic and social stability in fragile and conflict-affected areas, aiming to contribute to lasting peace, coexistence, and prosperity in the region.

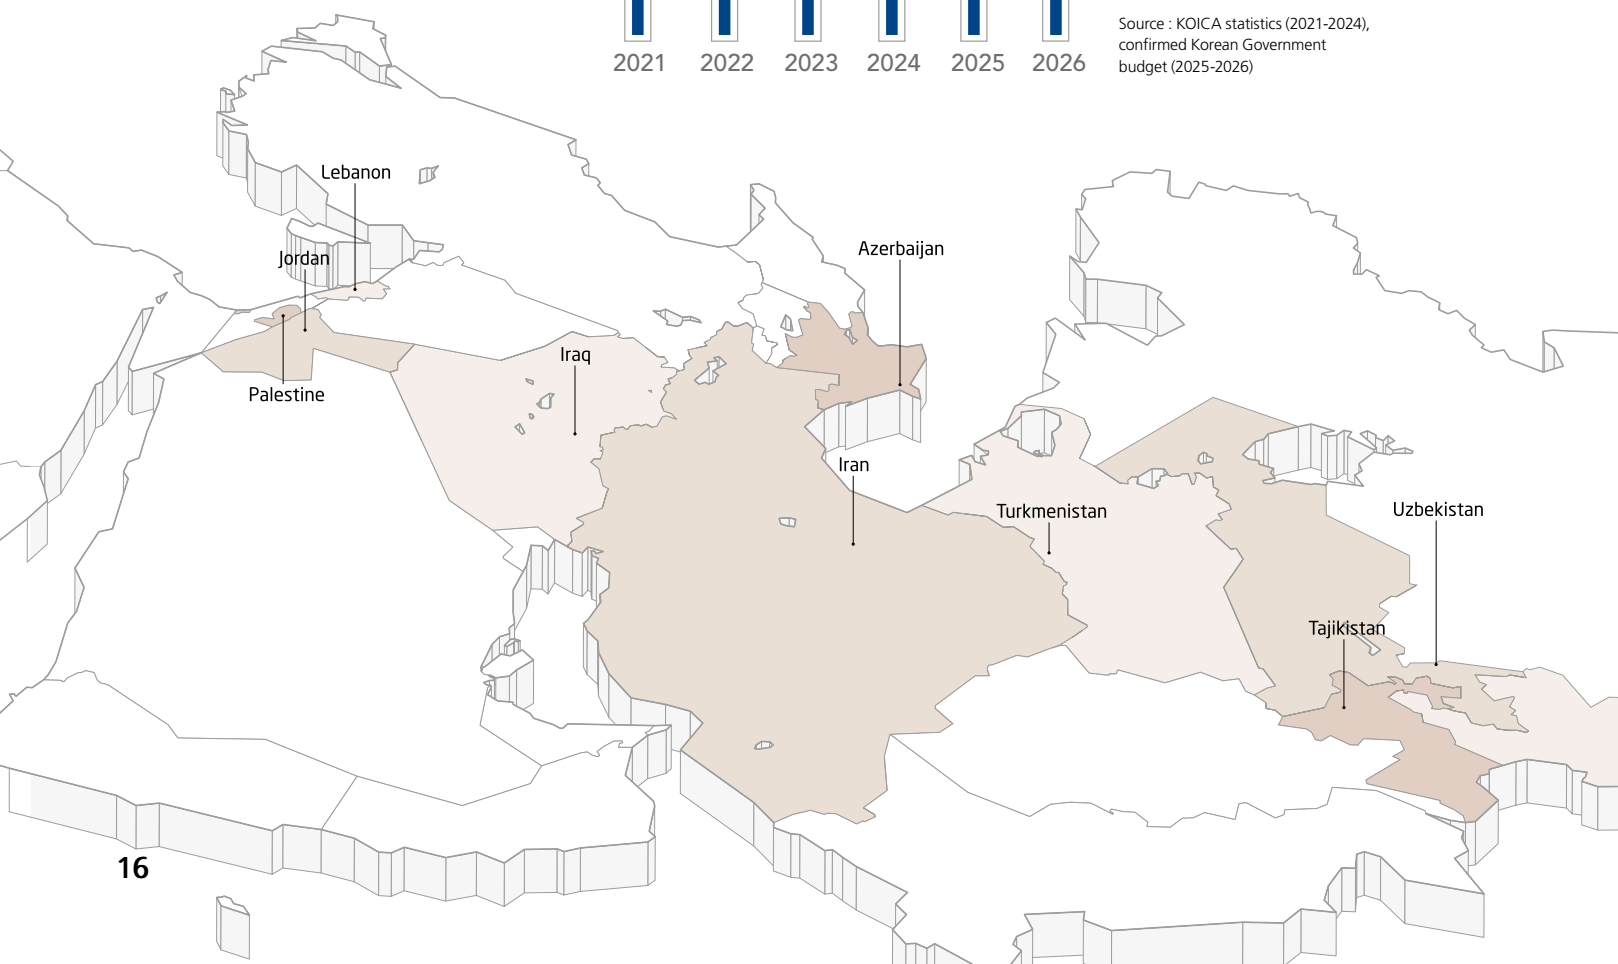

EURASIA· MIDDLE EAST

Uzbekistan children's hospital medical personnel capability enhancement project (2015-2023 / 7 million USD)

Background

In Uzbekistan, the lack of proficient medical personnel and medical devices in children's hospitals meant only less than 20% of paediatric patients were treated. Therefore, in 2013, the Uzbekistan government requested help from the Korean government for a free service project (KOICA-EDCF-KOFIH) to establish a children's hospital. This project aims to provide complex operations by adopting Korea's advanced diagnosis and treatment capabilities for childhood diseases.

KOICA's Role

Contribute to the quality improvement in children's healthcare during COVID-19

Establish a master plan for child clinical capability enhancement

Establish operation plan and support test operation (2 years)

4 major centers (cardiac, renal, neural, surgical) for pediatric clinical medical personnel capability enhancement
Capability enhancement for bedside training and advanced theories

Establish a master plan for child clinical capability enhancement

TEAM KOREA

Build cooperation system

Tashkent national children's medical center's medical personnel
Open training center
Set up a basic plan for the education and training

KOICA-UNICEF Project on Improving Education Quality in the West Bank in the State of Palestine (2021–2026 / 7 million USD)

Background

In the West Bank, 66.5% of schools face water shortages, and on average, one drinking water facility is shared by 49.5 students, significantly exceeding the Palestinian Ministry of Education's recommended standard of 30. Additionally, one toilet is used by 42 students, far surpassing the SDGs recommendation of 25. Furthermore, one WASH facility is shared by 72 students, highlighting the urgent need for educational environment improvements in the region. Beyond infrastructure challenges, prolonged conflict in Palestine has led to severe direct and indirect exposure of youth to violence and conflict-related situations. Widespread domestic violence, harsh disciplinary practices, early marriage, child labor, and sexual abuse have deeply affected communities, perpetuating a cycle of violence, conflict, and trauma that continues to destabilize the region.

KOICA's Role

Academic Achievement of Students

Enhancement of teachers' knowledge in basic sciences and learner-centered teaching competency

Enhancement of education quality

Improvement of school water, sanitation, and classroom environments

Creation of a safe school environment

Strengthening the capacity of schools and communities to prevent and address school violence

Latin America & the Caribbean

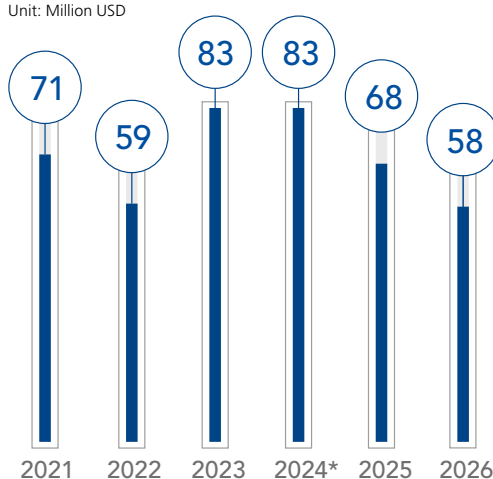

Promoting Inclusive Development and Economic Growth, Supporting the Achievement of the Sustainable Development Goals (SDGs)

KOICA has established the foundation for regional development cooperation partnerships in Latin America through the '3rd KOICA Regional Cooperation Strategy for Central & South America(2023-2027).' Considering the economic status of Latin America, where many countries are classified as middle- and high-income nations, KOICA is building a model to strengthen industrial competitiveness based on technological innovation and digitalization. This approach leverages each country's capabilities to establish diversified partnerships, such as triangular cooperation. Furthermore, KOICA incorporates inclusive development into Country Plan by addressing not only cross-cutting issues such as gender equality and climate change but also regional challenges related to peace and security, including refugee crises and public safety.

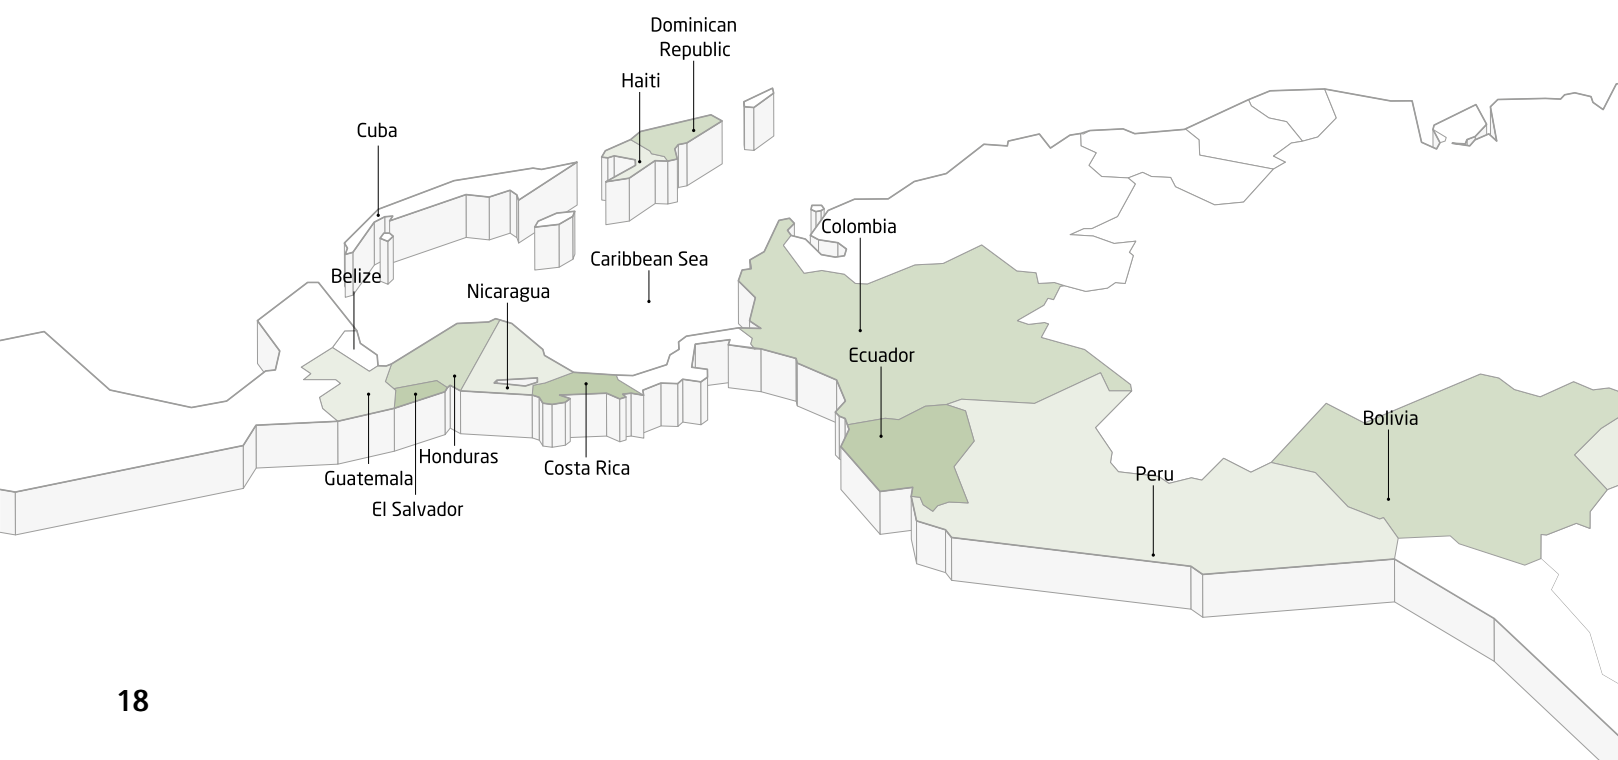

The Scale of aid in Latin American & the Caribbean Region

2021~2026
Unit: Million USD

Source : KOICA statistics (2021-2024), confirmed Korean Government budget (2025-2026)

LATIN AMERICA AND THE CARIBBEAN

Formation & Consolidation of MICRORED in the Central Department of Limpio Municipality, Paraguay (2016–2023 / 14.43 million USD)

Background

Paraguay faces significant challenges in its healthcare system due to the lack of primary healthcare facilities, such as local health centers. This shortage has led to an overflow of patients at secondary and tertiary hospitals, resulting in a decline in overall healthcare quality. To support the Paraguayan government, which prioritizes securing healthcare services as a key development strategy in the social and cultural sectors, KOICA implemented a healthcare system development and primary healthcare strengthening project in Limpio. Through this initiative, KOICA contributed to enhancing healthcare accessibility and improving public health by reinforcing the local healthcare system.

KOICA's Role

Improving Access to Primary Healthcare Services
and Enhancing Healthcare Quality

Construction, remodeling, and provision of medical equipment for 20 health centers in Limpio

Infrastructure and system improvements for Limpio Hospital, a secondary healthcare facility

Capacity building for healthcare personnel, prevention and management of non-communicable diseases (NCDs) such as diabetes and hypertension, and enhancement of regional health information systems

Promoting Gender Equality for the Exercise of Sexual and Reproductive Rights in Bolivia (UNFPA) (2021–2025 / 7 million USD)

Background

KOICA, in collaboration with the UNFPA, is implementing this project in four Bolivian cities—La Paz, El Alto, Cochabamba, and Santa Cruz—to improve sexual and reproductive health and rights (SRHR). This initiative targets key stakeholders, including students, parents, teachers, healthcare professionals, municipal government officials, and law enforcement officers, providing education on SRHR and gender-based violence (GBV) prevention and response policies. Through this project, KOICA aims to promote gender equality in Bolivia by advancing policy and education initiatives. The project's key objectives include reducing adolescent pregnancy rates, increasing the use of modern contraceptive methods, and lowering the proportion of children and adolescents exposed to GBV.

KOICA's Role

SRHR and Gender Equality Education & GBV Prevention and Response

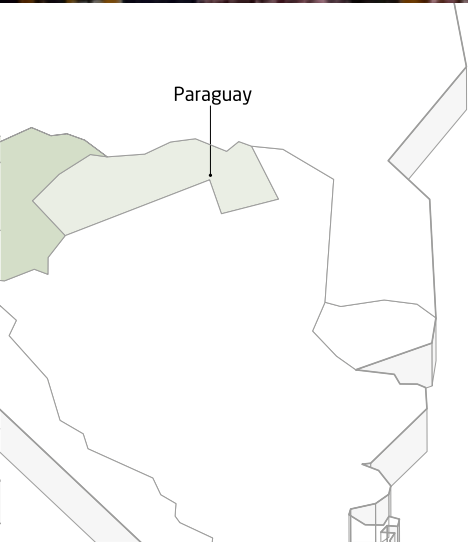

Donated equipment and supplies to 79 healthcare facilities for SRHR services
- Trained healthcare professionals to provide SRHR services

Conducted 250 youth SRHR outreach programs

- Provided psychological counseling and education on SRHR to youth
- Conducted integrated sexuality education in schools for youth

KOICA What We Do

Sectors

Education

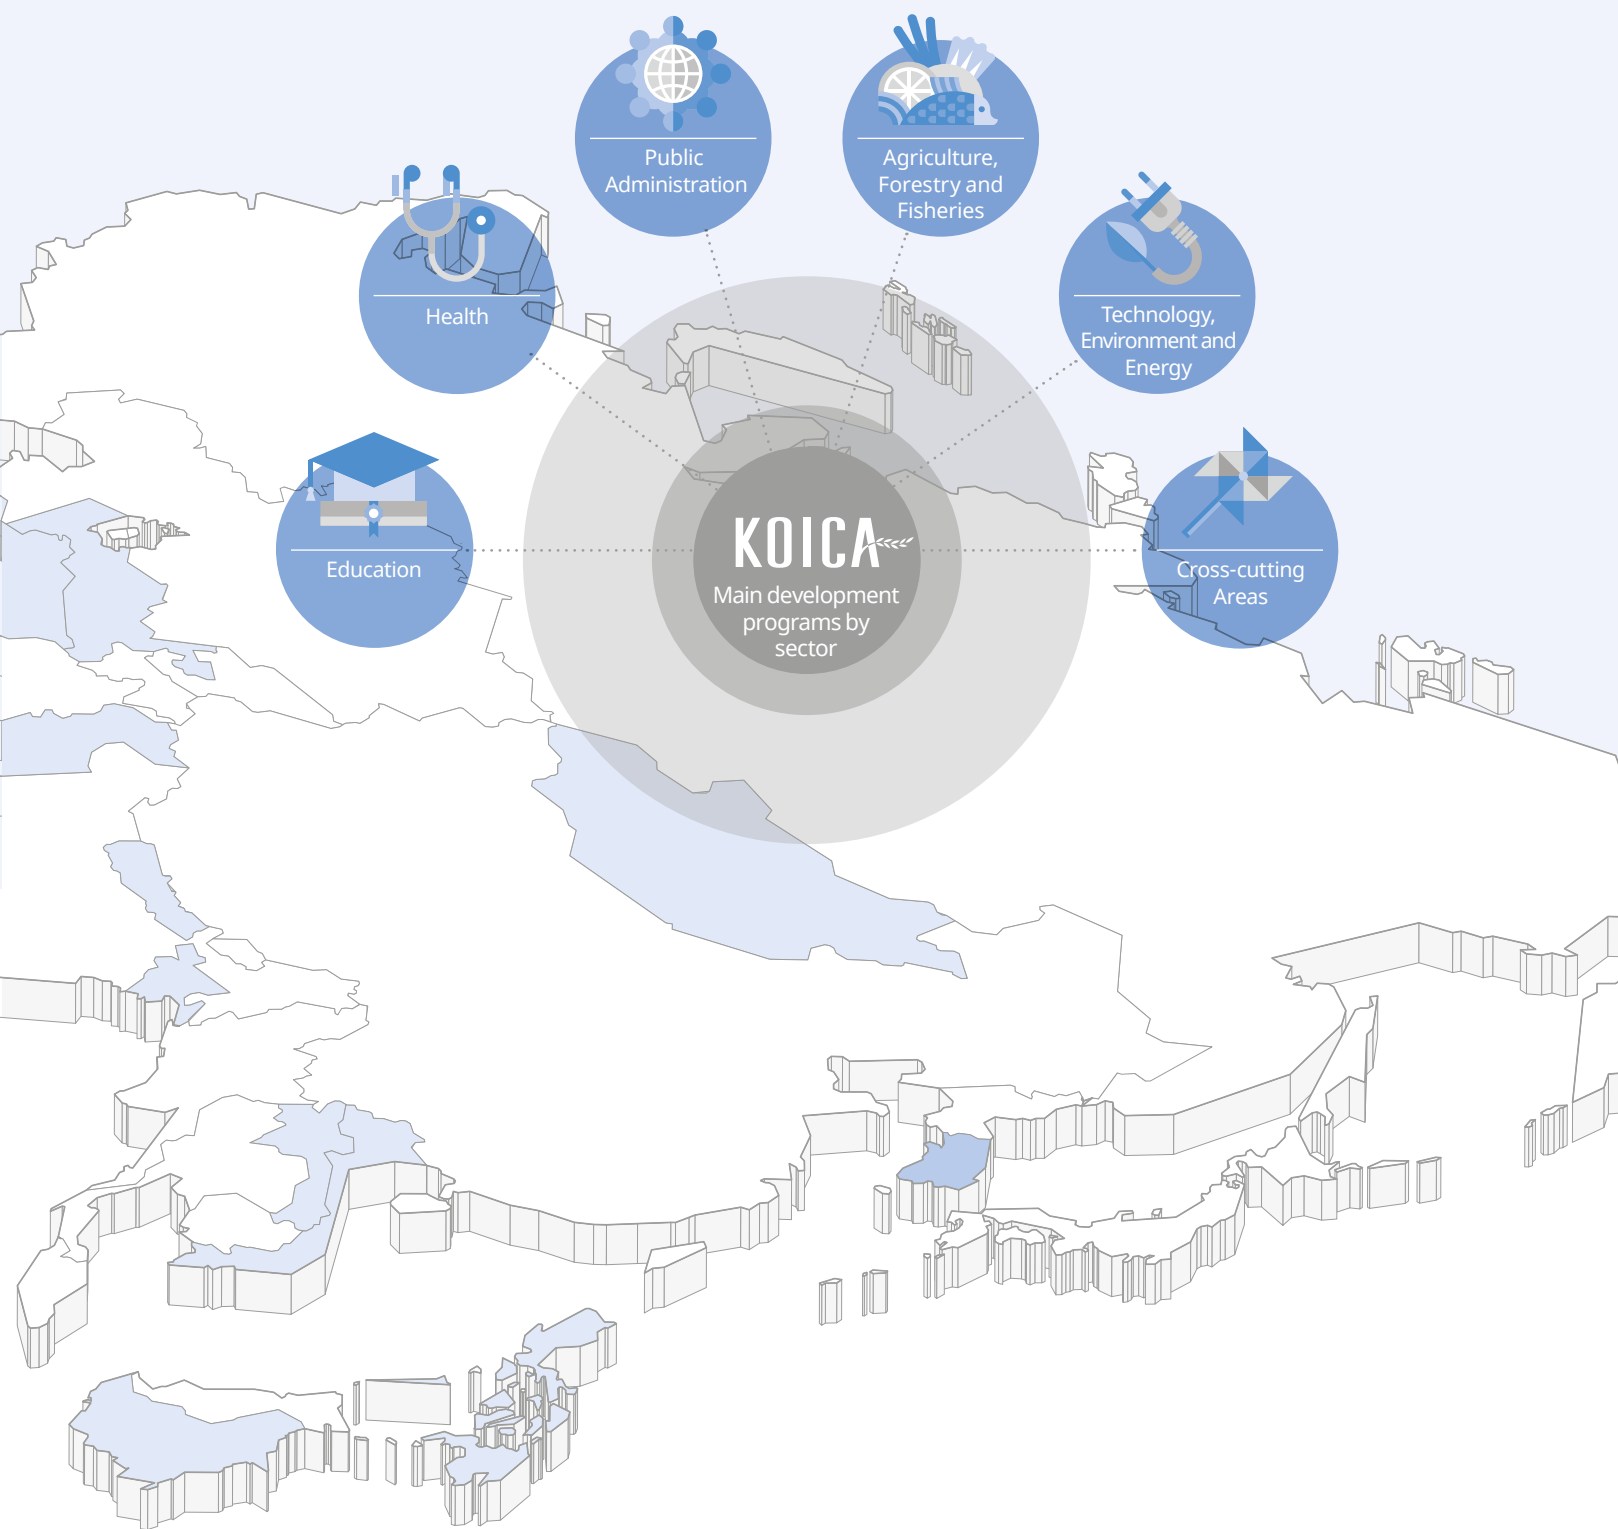

Health

Public Administration

Technology, Environment and Energy

Agriculture, Forestry and Fisheries

Cross-cutting Areas

01 Education

Contributing to Improved Education Systems and Advancing the Right to Education for All

KOICA prioritizes projects in the education sector so that people in developing countries can access quality education and develop their capabilities for a better future. Based on its Education Mid-Term Strategy, KOICA focuses on quality education to improve learning outcomes, digital education to develop future skills, and Technical and Vocational Education and Training (TVET) and higher education for human resources development. It is also developing a structured approach to project content and implementation modalities to help achieve inclusive development through quality education. KOICA identifies and supports projects aimed at improving learning outcomes in basic education, expanding access to education for vulnerable groups, building digital learning environments, developing digital skills, strengthening TVET capacity, and improving access to higher education.

Project to Strengthen ICT Education Capacity among Teachers and Pre-service Teachers in Rwanda(2017-2024 / USD 7.3 million)

Background

The Sustainable Development Goals (SDGs) identify information and communication technology (ICT) skills as essential competencies that youth and adults should develop through education. However, youth in most sub-Saharan African countries study in under-resourced learning environments. In Rwanda, computers are available in approximately 80% of secondary schools, but there is an urgent need to strengthen teachers' capacity to use computers in the classroom. It is therefore critical to provide students with opportunities to acquire essential 21st-century competencies.

KOICA's Role

Strengthening 21st-century core competencies among Rwandan youth

ICT-integrated
teaching training
43,000
in-service teachers

- Supporting in-service teachers in developing ICT-integrated lesson plans
- Strengthening capacity to deliver subject-specific ICT-integrated instruction
- Establishing two education innovation training centers in each region

Continuous teacher training

Supporting the Ministry of Education's capacity to supervise and support ICT education so that the Government of Rwanda can continue providing teacher training in the future

02 Health

Contributing to Quality Primary Health Care Services and the Achievement of Universal Health Coverage

Health is a fundamental right for all people and an essential condition for the economic and social development of developing countries. Through its Health Mid-Term Strategy, KOICA seeks to help ensure healthy lives by strengthening health systems in developing countries and providing quality health care services.

In line with the Sustainable Development Goals (SDGs), KOICA prioritizes RMNCAH*programs that promote health through a life-course approach, health emergency response programs that strengthen health security, and digital health capacity-building programs based on a comprehensive and phased approach.

*Reproductive, Maternal, Newborn, Child and Adolescent Health (RMNCAH)

Phase III Project for the Prevention of Pregnancy among Minors and the Improvement of the Environment for Women's Health in the Dominican Republic (2018-2026 / USD 4.7 million)

Background

The Dominican Republic's adolescent birth rate is 24.7% higher than the Latin American average. The Dominican Republic has therefore recognized adolescent pregnancy as a priority social issue and is making concerted efforts at the whole-of-government level by developing a strategy and establishing a dedicated body to reduce adolescent pregnancy.

Through a series of linked projects implemented in cooperation with the Dominican Republic's Ministry of Women, KOICA is building educational infrastructure for adolescent pregnancy prevention, providing integrated sexual and reproductive health services, and strengthening the capacity of professionals. Through these efforts, KOICA is taking a multifaceted approach to improving adolescents' awareness of and attitudes toward sexual and reproductive health and ultimately contributing to a reduction in the adolescent pregnancy rate.

KOICA's Role

Improving adolescents' awareness of sexual and reproductive health

Supporting the construction and operation of sexual and reproductive health centers

- Developing and distributing national standard materials for adolescent sexuality education
- Training peer educators and supporting SRH (Sexual and Reproductive Health) awareness-raising and outreach activities
- Strengthening the capacity of teachers, parents, relevant consultative bodies and local committees

Preventing adolescent pregnancy

- Increasing adolescents' use of modern contraceptive methods
- Reducing the adolescent pregnancy rate

- Project to Prevent Pregnancy among Minors and Strengthen Health Management (2006–2008 / USD 400,000)
- Phase II Project for the Prevention of Pregnancy among Minors and the Improvement of the Environment for Women's Health (2008–2015 / USD 1.3 million)
- Follow-up Project to Phase II of the Project for the Prevention of Pregnancy among Minors and the Improvement of the Environment for Women's Health (2015–2017 / USD 300,000)
- Phase III Project for the Prevention of Pregnancy among Minors and the Improvement of the Environment for Women's Health in the Dominican Republic (2018–2026 / USD 4.7 million)

03 Public Administration

Providing Diverse Support for Building Inclusive and Peaceful Societies

KOICA recognizes that building inclusive and peaceful societies through peace, justice and governance is essential to achieving the SDGs as a whole. Accordingly, KOICA implements projects with a focus on laying the foundations for peaceful lives, promoting participatory and inclusive democracy, developing safe and fair judicial and public security systems, and advancing accountable and efficient public administration systems. Drawing on Korea's comparative advantage in ICT, KOICA also provides diverse support to develop projects that lead to policy and institutional improvements using digital and other technologies, including AI.

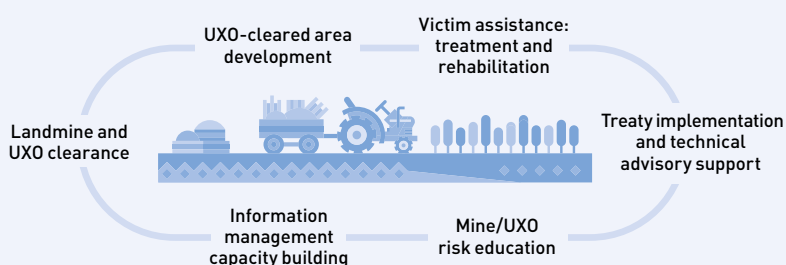

Mekong Future Peace Community Program (2019-2030 / USD 92.04 million)

Background

During the Indochina War and civil conflicts, cluster munitions and landmines caused hundreds of thousands of casualties in the four Mekong countries—Viet Nam, the Lao PDR, Cambodia and Myanmar. Areas contaminated by unexploded ordnance (UXO) and landmines also restricted productive land use, creating major constraints on local development. KOICA therefore saw the need for a comprehensive approach with a clear vision and strategy to address landmine and UXO issues and achieve the countries' shared goals. This led to the Mekong Future Peace Community Program, which integrates KOICA's core values of peace, people, prosperity and planet.

KOICA's Role

Contributing to the expansion of peaceful rural communities where rural areas are free from explosive remnants of war (ERW), UXO victims' human rights are protected, and marginalized communities can prosper.

* Before launching the program, KOICA enhanced participatory planning and partner-country ownership through joint workshops with partner institutions in each country and an international forum involving domestic and international experts.

04 Technology, Environment and Energy

Supporting Economic Infrastructure Development for Sustainable and Inclusive Growth

Developing economic infrastructure and promoting innovation in science and technology serve as drivers of self-reliant economic growth and are essential for sustainable development in developing countries. Through its mid-term strategies for each sector (2021–2025, Phase 2)—covering transportation infrastructure, water resource development, power infrastructure expansion, science and technology innovation, and urban development—KOICA strives to help achieve the Sustainable Development Goals (SDGs), advance the green transition toward carbon neutrality (Net-Zero), and implement the Korean government’s Green ODA Strategy. In doing so, KOICA aims to contribute to eco-friendly, inclusive economic and social development in partner countries. The following outlines KOICA’s focus areas by sector.

(Cambodia-Korea Friendship Road)

Water

KOICA endeavors to safeguard ‘water as a natural right for all.’ We work to ensure access to clean water and sanitation essential for daily life and promote the sustainable use of water resources. Additionally, we operate water disaster management programs to bolster climate crisis response and resilience, thereby helping partner countries resolve water-related issues.

Energy

Through fair energy production and consumption, KOICA fosters sustainable development. We contribute to global carbon neutrality by disseminating and scaling up eco-friendly energy sources, such as solar power. In addition, we enhance technical cooperation to improve energy efficiency and power quality, and promote inclusive growth by expanding access to modern energy for marginalized groups.

Transportation

KOICA emphasizes realizing sustainable transportation from economic, social, and environmental perspectives. We support economic development by building transportation networks and improving mobility, while striving to enhance road safety and create inclusive transportation environments that benefit vulnerable groups. We also pursue climate action projects through eco-friendly policies and technologies.

Cities

KOICA focuses on the digital, green, and inclusive transformation of cities. By adopting an integrated, cross-sectoral approach, KOICA supports sustainable urbanization and smart urban growth based on careful planning, inclusive urban development that considers vulnerable populations, and the creation of resilient and safe urban environments.

Science & Technology Innovation

KOICA implements a variety of initiatives aimed at supporting inclusive growth through science and technology innovation by strengthening partner countries' innovation systems. Recognizing the critical role of scientific and technological innovations in addressing economic and social challenges, KOICA has defined three strategic objectives: Building systems in the field of science and technology, supporting industrial development grounded in technological innovation, and providing innovative solutions to economic and social problems in partner countries. To achieve these objectives, KOICA undertakes projects such as offering consulting services for formulating science and technology policies, fostering technology-based start-ups and employment opportunities, supporting business commercialization, and leveraging the innovation capabilities of the domestic private sector to assist partner countries.

Fiji Agrophotovoltaic Program (GCF) **(2020-2027 / 8.41 million USD)**

KOICA's Role

The Fiji government has committed to the international community for 100% renewable energy generation by 2035 as the Nationally Determined Contribution (NDC), and to achieve it, the 5-year green growth framework development plan and 20-year strategic vision have been implemented. Ovalau Island, the target of this project, is currently 100% dependent on diesel power generation. Comprehensively considering the local population size, the amount of electricity consumption, and the growth rate of the local economy, it is expected that the impact on climate change response such as reduction of greenhouse gas will be significant if the conversion to a Zero Carbon Island based on solar power generation is considered. In addition, the Fiji government is feeling a sense of crisis in food security due to the effects of drought, flood and typhoon, which are exacerbated by climate change, and is seeking solutions. KOICA identified the needs of the recipient country and discussed ways to cooperate with the Fiji government on an agricultural coexistence solar power business model that can effectively implement renewable energy generation and climate change adaptation agricultural development at the same time. Green Climate Fund (GCF) was finally selected as a related project. This project is expected to reduce greenhouse gas emissions of 90,000 tCO₂eq per year.

Source : <https://www.donga.com/news/article/all/20201217/104487964/2>

Contribute to food security by reducing greenhouse gas and growing crops by installing an agricultural coexistence solar power plant on Ovalau Island in Fiji, which is severely affected by climate change.

Installing an agricultural coexistence solar power plant

- Install a 4MW solar power plant
- Construct a 5MWh energy storage system (ESS) & micro grid system construction
- Establish farmland and infrastructure using 5ha agricultural coexistence system
- Support for solar and microgrid operation and maintenance training
- Dispatch experts related to GCF program implementation and support for education and training
- Reinforce sustainable crop cultivation capacity using agricultural coexistence system targeting vulnerable groups

05 Agriculture, Forestry and Fisheries

Formulating Strategies for the Improvement of Rural Food Security and Sustainable Development

KOICA is pursuing projects in agriculture, forestry, fisheries, and rural development to increase the income of rural residents and improve their quality of life. As half of the world's population lives in rural areas—of which 90% reside in developing countries and 60% of those are in absolute poverty—the importance of rural development for vulnerable groups continues to grow. Based on its mid-term strategy for rural development, KOICA is contributing to poverty reduction and quality-of-life improvement among residents of rural and fishing villages by building sustainable agricultural production foundations and food supply systems in developing countries, and by supporting improvements to living environments and community organizations. In addition, KOICA plans to expand support for the conservation of natural resources and agricultural ecosystems and for the prevention of land degradation in response to climate change.

Project for the Post-harvest Technology Assistance Program in Myanmar

Project for the Establishment of Sustainable Model Villages (ESMV) in Uganda (2019-2024 / 5.9 million USD)

Background

In Uganda, the first rural development project (Project for the Establishment of Saemaul Model Villages in Uganda / 2015-2018 / USD 2.95 million) achieved outcomes including increased income, enhanced community trust, improved residential environments, and growth in village community funds. Building on this experience, KOICA expects to consolidate existing achievements in the field and to spread them to surrounding areas, thereby directly and indirectly influencing rural development strategies at the government level. In particular, it is expected to breathe new vitality into Uganda's rural communities and contribute to the socioeconomic sustainability of those communities by adopting a two-way communication approach—whereby villagers independently formulate and support village development plans through voluntary participation, while Korea's experience is shared and its local applicability is explored.

KOICA's Role

Establishment of a mutually cooperative governance system among local residents, villages, and local governments
/ Promotion of linked projects with other domestic ministries and agencies*

- Support for infrastructure including reservoir and market construction
- Support for community-led income generation projects
- Education on improvement of residential environment and sanitation
- Additional agricultural technology support for consolidation of Phase 1 outcomes, and support for local agricultural product marketing
- Farmer technical training and domestic invitation programs

Sustainability Enhancement -Expected Outcomes

- Increased income of rural households
- Improvement of residential living environment and heightened sanitation awareness
- Improved access to basic services (markets, water resources)

* Related linked projects: KOPIA Uganda 'Vegetable Productivity Improvement'; MG Korean Federation of Community Credit Cooperatives 'Uganda Village Savings Support Project,' etc.

06 Cross-Cutting Areas

In addition to its five priority sectors, KOICA has identified significant global issues—such as the environment, gender equality, and human rights—as cross-cutting issues, and actively pursues comprehensive solutions. Guided by its mission to 'Contributing to the common prosperity and the promotion of world peace through inclusive, mutual development cooperation leaving no one behind,' KOICA aligns these cross-cutting issues with its 5P—People, Peace, Prosperity, Planet, and Partnership—to help achieve Sustainable Development Goals 5 (Gender Equality), 13 (Climate Action), and 16 (Peace). (5P x SDG 5-13-16)

Climate Action

Actively Supporting Partner Countries' Climate Change Response Efforts

Addressing climate change and preserving environmental values are indispensable prerequisites for realizing other Sustainable Development Goals (SDGs) in developing countries. Through the Paris Agreement, the international community has established a global climate response framework that encompasses both developed and developing nations. Meanwhile, mechanisms are being created to provide financial and technological support to developing countries in combating climate change, and development cooperation agencies are striving to “mainstream” environmental considerations in their projects. By formulating its Mid-Term Climate Action Strategy(2021-2025) and advancing Green ODA and carbon neutrality programs, KOICA aims to contribute to the achievement of SDG 13 and to attain net-zero emissions by 2050. In addition, through its environmental and social safeguard policies, KOICA endeavors to minimize the environmental and social impacts of projects carried out in partner countries.

Afforestation Project in Myanmar

Vietnam industries energy efficiency investment vitalization project

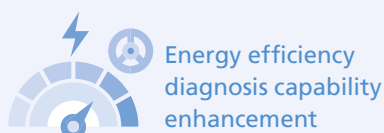

- Stage 1 (2017-2020 / 1.9 million USD)
- Stage 2 (2021-2025 / 6.4 million USD)

Background

This project follows the 'Vietnam green growth masterplan establishment project'(2013~2015/ 2million USD), and is one of the test projects connected with the Green Climate Fund(GCF). We have established a new model of climate response project with the cooperation of 'Vietnam industries energy efficiency investment vitalization project' by World Bank, which results in 3 parties' cooperation, KOICA, World Bank and GCF.

KOICA's Role

Provide consultation about energy efficiency improvement and enhance capability in Hanoi and Bac Ninh industrial complexes

Identify investment projects in energy efficiency

for industries that need energy efficiency

Support for execution of investments and financing related to energy efficiency

Reduce greenhouse gases and respond to climate change by achieving energy efficiency

Gender Equality

Focusing on Economic Participation, Social Status and Fundamental Rights

Based on SDG 5 on Gender Equality, KOICA identifies gender equality support projects in three key strategic areas: economic participation, social status and fundamental rights.

KOICA continues to support long-standing gender equality priorities, including gender-based violence, women's economic empowerment, and sexual and reproductive health and rights (SRHR). At the same time, KOICA is gradually expanding gender-responsive elements in areas where global demand is rapidly increasing, such as climate change, conflict-affected and fragile contexts, infrastructure, science and technology, and digital technology, while also strengthening its engagement in global partnerships.

By adopting a more flexible approach to identifying and designing gender equality projects, KOICA has steadily increased the share of projects marked as Gender Marker 1, where gender equality is a significant objective, since 2018.

To scale up these efforts effectively, KOICA also places emphasis on strengthening the capacity of stakeholders. KOICA has developed open-source training content to promote gender-responsive ODA. Continuously disseminating a number of referential materials, such as KOICA Gender Facts, How to Do Gender Development Cooperation Program (GDGP) with KOICA, and Results Management Framework, KOICA is expanding Korea's ecosystem for gender equality and the empowerment of women and girls in developing economies.

Peacebuilding Project through the Prevention of Gender-Based Violence and Integrated Support in Conflict-Affected and Fragile Areas of the DRC (UNDP, UNFPA) (2020–2026 / USD 8.6 million)

Background

In the Democratic Republic of the Congo (DRC), which has experienced decades of civil war and near-civil-war conditions, women continue to suffer severe harm and hardship amid persistent political instability.

Since 2020, KOICA and the Government of the DRC have supported the response to and prevention of gender-based violence against women in conflict-affected and fragile areas. The project includes establishing a one-stop support center system and strengthening the capacity of relevant personnel.

KOICA's Role

Establishing infrastructure for one-stop support centers for women survivors of violence (developing physical spaces, providing equipment, etc.)

Capacity development for one-stop support center staff

- Dispatching experts in medical care, counseling, investigation and legal assistance
- Administrative support, training, and development of training materials

Strengthening the government's integrated coordination capacity

- Establishing governance structures at central and local government levels
- Strengthening capacity for institutional development
- Holding knowledge-sharing seminars

Human Rights

In line with the spirit of the Framework Act on International Development Cooperation, KOICA works to advance the rights of vulnerable groups, including women, children, persons with disabilities and youth. As an implementation framework for this effort, KOICA has adopted a Human Rights-Based Approach (HRBA) and is pursuing a range of institutional measures. These include analyzing the human rights situation in partner countries, taking preventive measures against human rights risks such as conducting human rights impact assessments, applying human rights principles to performance indicators and evaluation criteria, and improving accessibility for persons with disabilities. Accordingly, various project components—such as strengthening partner countries' institutional capacity on human rights and ensuring social protection and participation for rights-holders—are linked with priority sectors, including education and public administration, enabling human rights as a cross-cutting issue to be advanced in development cooperation practice.

KOICA also seeks to carry forward the spirit of the Incheon Strategy (2013–2022), a 10-year action plan for realizing the rights of persons with disabilities in the Asia-Pacific region. To this end, KOICA is working to create an enabling environment for strengthening disability-inclusive development cooperation, including by supporting the activities of organizations of persons with disabilities in the Asia-Pacific region and cooperating with international human rights organizations.

Development of the Community Rehabilitation Center for People with Disability in Quang Tri Province, Vietnam(2022–2026 / USD 12 million)

Background

Quang Tri Province in Viet Nam was one of the areas most severely affected by the war in Viet Nam and has the largest number of people with long-term disabilities resulting from landmines, UXO and Agent Orange. However, many persons with disabilities in Quang Tri Province live in rural areas and have limited access to social welfare services. Through this project, which is based on the Community-Based Rehabilitation (CBR) model, KOICA seeks to strengthen the capacity of rehabilitation professionals and improve the living conditions of persons with disabilities by integrating fragmented disability rehabilitation services into a community-based service system. The project also supports persons with disabilities, their families and non-governmental organizations (NGOs) in participating in various rights-pro motion activities through the rehabilitation center, helping persons with disabilities become agents of change in their own lives.

01 Country Programs and Projects

Country Programs and Projects are multi-year, strategic initiatives dedicated to driving socio-economic progress and enhancing social welfare in developing countries. By bridging Korea's regional diplomatic priorities with the specific development needs of partner countries, KOICA delivers impactful, context-driven results. Our project identification and execution are guided by alignment with the Country Partnership Strategy (CPS), KOICA's Country Plan (CP), and long-term regional or sectoral frameworks.

KOICA delivers these initiatives through three specialized operational frameworks:

Bilateral Projects

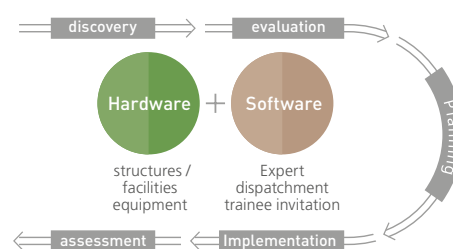

This model emphasizes a holistic integration of "Hardware" (infrastructure and equipment) and "Software" (technical expertise and capacity-building). To address complex global issues more effectively, this framework also includes Multi-bilateral Projects, which leverage the specialized networks and technical excellence of international organizations.

Public Partnership Programs

Designed to promote inclusive development, this model invites Korean government ministries, local authorities, and public institutions to bring their sector-specific expertise to the ODA landscape. KOICA provides the strategic funding, empowering partners to leverage their professional networks for greater impact.

KOICA Standardized Operating Model

This model leverages KOICA's ODA expertise to provide long-term, result-based solutions for key development issues.

Pacific Risk Resilience Programme(PRRP) II (2019–2024 / 7.5 million USD)

Background

Since 2019, KOICA has collaborated with Australia (DFAT), New Zealand (MFAT), and Sweden (SIDA) to support the United Nations Development Programme (UNDP) in implementing a climate change adaptation and gender mainstreaming project for six Pacific Island Developing States severely impacted by climate crises: Fiji, Kiribati, the Marshall Islands, the Solomon Islands, Tuvalu, and Vanuatu.

Through this initiative, climate change and disaster risk reduction have been systematically integrated into the national and local development policies of Pacific Island countries. The project has influenced 11 national policies related to national development planning, budgeting, and implementation systems, embedding key principles of Gender and Social Inclusion (GSI) and Risk-Informed Development (RID) based on risk data and analysis.

02 Global Leaders Program

WFK Overseas Volunteer Programs

We are friends to those in need in partner countries. World Friends Korea, commonly known as WFK is the integrated brand of overseas volunteers of South Korean government.

WFK Overseas Volunteer Programs

The Korea International Cooperation Agency(KOICA) plays pivotal roles in program management of WFK. KOICA is dedicated to the development of Korea Overseas volunteer program.

WFK KOICA Advisory Program

1-3 years

Dispatch in private and public sector to transfer of know-how for Korean industrial development

Agency Korea International Cooperation Agency (KOICA)

Eligibility Retirees (to-be) who have at least 10 years of experience in relevant fields

WFK Youth Volunteers

2-3 weeks (KUCSS)
2-3 weeks (PAS)

Short-term volunteer program for college students, including collaborative activities with local university students

Agency Korean University Council for Social Service (KUCSS)
Pacific Asia Society (PAS)

Eligibility College students

WFK IT Volunteers (NIA)

2-3 weeks

Dispatch IT volunteers, ranging from university students to IT experts, to developing countries to enhance IT accessibility and capabilities

Agency National Information Society Agency

Eligibility Those aged 18 or older

WFK Taekwondo Volunteers (TPF)

4~5 weeks,
within 6 months

Dispatch Taekwondo volunteers to developing countries to foster local leadership and enhance the status of Taekwondo and South Korea.

Agency Taekwondo Promotion Foundation (TPF)

Eligibility Youths aged 19-34 with a Taekwondo 3 dan

WFK KOICA Volunteer

1-2 years

Supports the resolution of development issues through the dispatch of volunteers in various sectors including education, health, public administration, energy industry, and agriculture.

Agency Korea International Cooperation Agency (KOICA)

Eligibility Korean citizens aged 19 and above.

WFK NIPA Advisory Program (NIPA)

1-3 years

Consulting on industrial development in partner countries by dispatching retired professionals in areas such as information and communication, energy resources, trade and investment

Agency National IT Industry Promotion Agency

Eligibility Retirees (to-be) who have at least 10 years of experience in relevant fields

WFK Techno Peace Corps (NRF)

1 year

Supporting science and technology in partner countries by dispatching experts in STEM fields

Agency National Research Foundation of Korea (NRF)

Eligibility Those holding a bachelor's degree or higher in science and engineering

WFK Korean Medicine Service Team Abroad (KOMSTA)

1 week

Providing various medical services such as medical relief projects centered on oriental medicine, seminars for local medical personnel, and clinical education

Agency Korean Medicine Service Team Abroad (KOMSTA)

Eligibility People aged 19 or older and Korean medicine medical license holders

WFK Korean Government-sponsored Volunteer Teachers Program (NIIED)

within 12 months

Dispatch current, prospective, and retired educators to schools and educational institutions in partner countries to improve basic education and provide high-quality learning opportunities.

Agency National Institute for International Education (NIIED)

Eligibility Teacher's certificate holders and professors in respective subjects

WFK KOICA Volunteers Program

Since 1990, KOICA Volunteer group with over 27,000 volunteers have been dispatched to partner countries, NGOs, and international agencies worldwide, actively engaging in various activities.

WFK KOICA Volunteers

WFK KOICA-Volunteers

1 year

Engaging in volunteer activities in over 50 specialized professions such as public administration, education, agriculture, forestry and fisheries, healthcare, technology based on the demand from partner countries

Eligibility

Korean citizens aged 19 or older

WFK KOICA-Project Volunteers

3-5 months

Outcome-driven, project-based, youth-focused team service that contributes to development issues in partner countries

Eligibility

Eligibility Citizens of the Republic of Korea aged 19 or older
*80% of the participants will be 34 years old or younger

WFK KOICA-NGO Volunteers

1-3 years

Dispatching volunteers in collaboration with private sectors such as NGOs of partner countries

Eligibility

Korean citizens aged 19 or older

WFK KOICA-Youth Volunteer Program

5 months

Utilize the talents and capabilities of youth volunteer group, engaging in education and exchange activities for the youth and people in partner countries

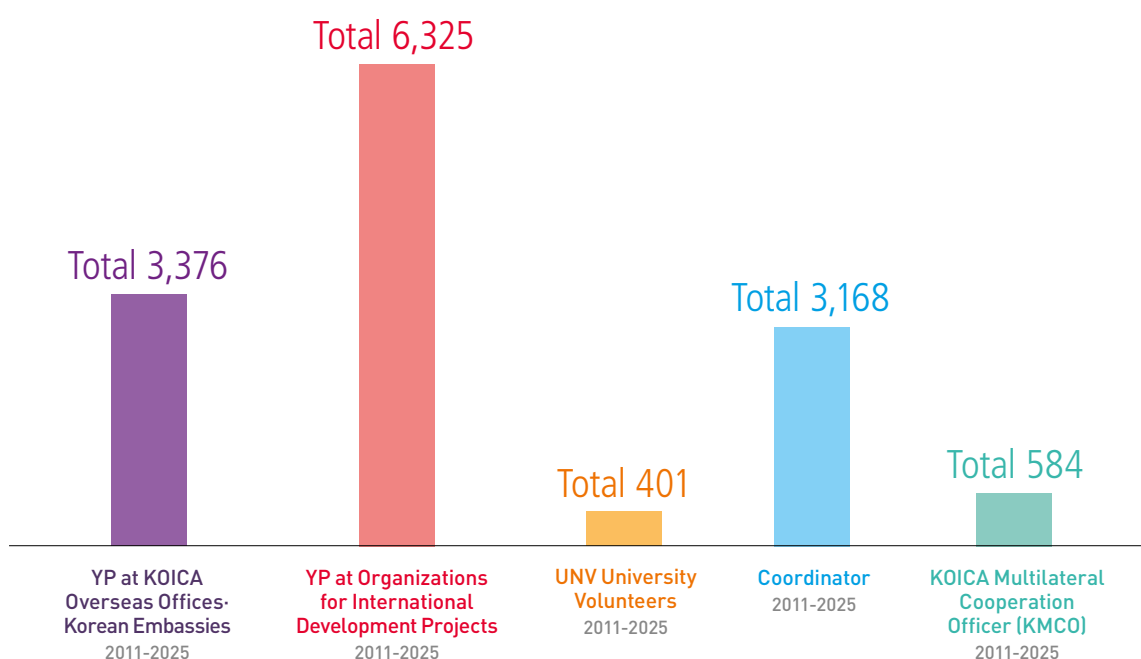

Eligibility

Youths aged 19-34

International Development Careers Program

Dispatch Outcomes

Dispatch Outcomes by Year

Program Name	Main content	Selection Frequency	Deployment Duration
YP at KOICA Overseas Offices · Korean Embassies	A program that provides youth with opportunities to participate in ODA projects, enhancing global competitiveness and developing expertise in international development cooperation by working at KOICA overseas offices or Korean embassies.	Twice a year (once per semester)	Up to 12 months (Initial 6 months + possible 6-month contract extension (limited to one time only))
YP at Organizations for International Development Projects	A program that allows young professionals to gain hands-on experience in ODA and international development cooperation projects by working in NGOs, universities, research institutes, private consulting firms, social enterprises, public institutions, or international organizations.	Twice a year (once per semester)	7 months (No extension)
UNV University Volunteers	A program that dispatches young Koreans to UN agency field offices to gain international experience in developing country, helping to cultivate global talent and support young professionals in entering the field of development cooperation.	Once a year	9 months
Coordinator	A program that offers practical work experience at KOICA overseas offices, helping participants build expertise in ODA operations and gain hands-on experience in the field of international development cooperation.	Twice a year (once per semester)	Up to 23 months (Initial 12 months + possible 11-month contract extension (limited to one time only))
KOICA Multilateral Cooperation Officer(KMCO)	A program that supports the dispatch of Korean experts to international organizations, allowing them to gain field experience and advance their careers in specialized development cooperation roles.	Once a year	Up to 24 months (Initial 12 months + possible 12-month contract extension (limited to one time only))
	Deployment Positions: Experts on Mission or professionals equivalent to P2–P3 levels Deployment Organizations: UNICEF, UNESCO, UNHCR, UNOPS, UNFPA, GGGI, WFP, UNDP(subject to change) Deployment Regions: National and regional offices of international organizations in host countries of the KOICA office		

03 Global Fellowship Program

CIAT : Capacity Improvement & Advancement for Tomorrow

The CIAT program is designed to share Korea's development expertise and technologies with policymakers, government officials, and sectoral experts from developing countries. The program offers on-site training in Korea, in-country training, and online courses, enabling participants to gain practical knowledge and skills. Trainees engage in both short-term training programs and long-term academic training, including master's and doctoral degree courses, to enhance their professional expertise. Recognizing that human capital is at the core of national development, KOICA provides tailored educational programs based on Korea's development experience to meet the genuine needs of developing countries. Furthermore, KOICA collaborates with Korean government ministries, public institutions, research institutes, and universities to deliver high-quality training, which has received strong recognition from partner countries. Additionally, CIAT alumni continue their engagement after returning home through the KOICA Club, an alumni network where they share experiences, contribute to their country's development, and foster continued cooperation. By doing so, these alumni play a crucial role in strengthening partnerships between Korea and partner countries, as well as enhancing bilateral relations and mutual cooperation.

Masters Degree Program in Control of Infectious Disease (Nepal) (2017–2024)

Background

To achieve SDG 3 (Good Health and Well-Being) and ensure universal health coverage, there is an increasing need for highly skilled professionals who can lead sustainable development and innovation in global health policies. In response, KOICA launched a global health master's degree training program to develop key personnel in this field. Nepal, in particular, faced severe challenges during the COVID-19 pandemic. Due to vaccine shortages, vaccinations were temporarily halted, and the daily infection rate surged to 50%. However, the country lacked sufficient human resources to effectively respond to the infectious disease crisis.

KOICA's Role

Strengthening Partner Countries' Infectious Disease Response Capacities and Policy Coordination

Contributed to the development of national health and medical policies in partner countries

Assisted in drafting Nepal's Human Resources for Health Roadmap 2030 to enhance the country's healthcare workforce

Enhanced for infectious disease response during the COVID-19 crisis

Supported the installation of temporary hospitals, deployment of medical personnel, and expansion of vaccine supply and distribution plans

Recognition and promotion of public health contributions in partner countries

KOICA trainee received the 2021 Nepal Presidential Award (Prabal Jansewa Shree Award) and invited to speak at an Australian health conference to share experiences and insights

Capacity Building for Combating Transnational Organized Crime(Uzbekistan) (2024–2026)

Background

Uzbekistan has established forensic science centers to modernize its criminal investigation system, but still the country faces challenges in training specialized personnel such as investigators. The lack of structured training and limited capacity in digital forensic analysis have made it difficult to handle organized and transnational crimes effectively. To address these issues, KOICA launched the 'Capacity Building in Scientific and Technical Police' targeting multiple countries, including Uzbekistan, and successfully achieved key outcomes. Building on this experience, KOICA has now initiated the 'Uzbekistan Transnational Crime Response Capacity Building Project (2024–2026)' as a follow-up initiative.

KOICA's Role

Comprehensive Technical and Educational Support for Establishing a Digital Forensic System, Training Experts, and Enhancing Capacity

Enhancing Crime Prevention and Investigation Capabilities

- Contributed to solving cases through digital forensics-based investigations, including the analysis of forged evidence
- Deployed digital forensic specialists across 12 key police agencies

Supporting Expert Training and Capacity Building

- Conducted specialized digital forensics training programs
- Trained and certified first two internationally accredited digital forensics professionals
- Supported the development of curricula for training prosecutors and investigators in digital forensics

Expanding the Digital Forensics System

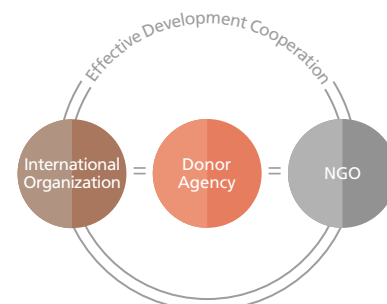

- Established an internal digital forensics center within the Ministry of Internal Affairs, along with the necessary equipment and software
- Contributed to the establishment of a digital forensics research center at the Prosecutor General's Academy

04 HDP Linked Thematic Program with Multilateral Partner

The Thematic Program with Multilateral Partner is being promoted by utilizing the expertise and network of international organizations, focusing on vulnerable countries and conflict regions, as the importance of the international community's joint response to global issues has increased. Through multifaceted aid, the project aims not only to respond jointly to global issues (poverty reduction, gender equality, climate change, human rights, etc.) but also to contribute to the achievement of the SDGs. In particular, humanitarian-development-peace (HDP Nexus) projects are carried out in refugee and host community areas where bilateral support is difficult.

This Program focuses on forming strategic partnerships with international organizations to create synergies with bilateral support, strengthens regular consultations, and monitors project sites to ensure careful management of the projects.

05 Development Innovation Program

Development Innovation Program (DIP) projects enhance the effectiveness of KOICA's development cooperation projects, explore new and diverse ways of boosting the capacity of private sectors in developing countries, and cooperate with partners with expertise. DIP projects are divided into the following three modules:

CTS aims to nurture pre-entrepreneur through incubation programs and help domestic social ventures with the development, demonstration, and expansion of technologies in order to encourage promising start-ups with innovative technologies.

IBS aims to actively connect financial resources and business strategies related to Corporate Social Responsibility (CSR) and Creating Shared Value (CSV) to ODA projects and to integrate Bottom of the Pyramid (BoP) populations into the business value chain in order to contribute to the sustainable development in developing countries.

IPS aims to apply and demonstrate the expertise of overseas agencies in new fields or countries and new project procedures by utilizing a partnership with overseas private agencies or bilateral and multilateral partners in order to solve development problems in developing countries.

Expansion of Tablet PC-based Educational App for Children Project

- Seed 1 (Technology Development Project: 2016-2017 / 185 million KRW)
- Seed 2 (Pilot Project: 2017-2018 / 360 million KRW)
- Seed 3 (Business Expansion Project: 2018-2021 / 999 million KRW)
- IBS (Inclusive Business Solution: 2021-2026 / 3 billion KRW)

Partner Company Enuma Inc.

Project Overview

Development of KITKIT SCHOOL, a table PC-based educational app for numeracy and literacy education for children in Tanzania, Uganda and Kenya and establishment of the sustainable business model through distribution and sales of products and services.

- Rise in the child literacy and numeracy rate by 10% and 14% each
- Winning the international education contest called Global Learning XPRIZE and 5 million USD sponsored by Elon Musk from Tesla ('19)
- Obtaining a 140 thousand USD order from International Rescue Committee (IRC) to promote education projects for refugee children in Rohingya, Bangladesh
- Embarking on the development of the Indonesian version of KITKIT SCHOOL in cooperation with HEAD Foundation, Kuok Group (₩ 1 million USD)
- Reaching the final of 2020 MIT Solve TPRIZE Challenge (₩ total 10 teams)
- Issuing 5,419 voluntary licenses in 47 countries through the online platform launched in 2020 in response to COVID-19

LG-KOICA Hope TVET College Project (2018-2021 / 2.37 billion KRW)

Partner Company LG Electronics Inc., World Together

Project Overview

Nurture skilled workers, support national certifications acquisition and provide opportunities for decent jobs and business by operating a vocational-technical college in electronics and IT.

- Focused on supporting descendants of war veterans, low-income groups, people with disabilities, vulnerable people including women and teenagers (43% of the freshmen of 2019), accomplished 100% of employment and business start-ups and 98.6% of the national certification acquisition rate
- Established E-Learning System responding to COVID-19 and 239 students participated, provided support for graduates' internship and employment (LG Middle East and Africa Corporation) etc.

Acceleration and Customized Technical Services (ACTS) for Social Enterprises (2018-2023 / 1.2 million KRW)

Partner Company IIX(Impact Investment Exchange)

Project Overview

Provide comprehensive management consulting to 19 early-stage social enterprises in Asia to attract investment, create quality jobs and contribute to economic development in developing countries

- Completed management consulting for 13 Asian early-stage social enterprises and investment attraction
- Achieved 5.12 million USD investment attraction in 5 Asian social enterprises

06 Humanitarian Assistance

Humanitarian assistance is a comprehensive concept that not only saves people from crises including natural disasters, conflicts and diseases, alleviates suffering and maintains and protects human dignity, but also prevents the occurrence of disasters and strengthens response capabilities. It consists of emergency relief that responds to urgent disasters overseas such as earthquakes, tsunami and infectious diseases, disaster risk reduction, disaster resilience improvement and long-lasting disaster support.

Humanitarian Assistance (Overseas Disaster Response)

- Complex Emergencies** Humanitarian assistance for prolonged conflicts, refugees/displacement, famine, and similar crises.
- Emergency Disasters** Humanitarian assistance in response to natural disasters such as earthquakes, typhoons, wildfires, and floods, as well as armed conflicts.
- Promise fulfillment** Support for global initiatives, including participation in ACT-A (Access to COVID-19 Tools Accelerator), contributions to GAHHP (Global Alliance Against Hunger and Poverty) and humanitarian aid for Ukraine's post-war reconstruction efforts.

Disaster and crisis-affected regions:
Syria, Yemen, Bangladesh, India, Indonesia, Sri Lanka, etc.

Provide cash and goods

Cash or goods (such as tents, tarpaulins, fences, and medical supplies) is provided through the affected government or international organizations.

- 2019** Provision of Cholera vaccines to Ethiopia
- 2020** COVID-19 response – support for diagnostic and protective equipment
- 2021** COVID-19 response – support for prevention, diagnosis, and treatment supplies; \$100 million contribution to COVAX AMC
- 2022** Humanitarian aid for flood victims in Pakistan
- 2023** Humanitarian assistance for earthquake victims in Türkiye
- 2022-2025** Humanitarian aid for Ukraine
- 2025** Humanitarian assistance for earthquake victims in Myanmar

Disaster-stricken regions*:
Philippines, Sierra Leone, Nepal, Laos, etc.

KDRT dispatch

KDRT is deployed upon request from affected countries based on the decision of the Private-Public Joint council for Overseas Emergency Relief

Permanent Operation of the Korea Disaster Relief Team (KDRT)

KOICA operates the KDRT Secretariat to strengthen the emergency response capabilities of Korea's relief team. In collaboration with key dispatching institutions — including the National 119 Rescue Headquarters, the National Medical Center, and the Korea Foundation for International Healthcare — KOICA expands and maintains emergency relief equipment while providing education and training for KDRT personnel.

KDRT has obtained the highest “Heavy” classification under the UN International Search and Rescue Advisory Group (INSARAG) classification system. It successfully renewed this classification in 2016 and 2023 through periodic reassessments conducted every five years. Additionally, in 2022, Korea's medical team achieved Type-1 Fixed certification under the World Health Organization Emergency Medical Team (WHO EMT) evaluation system.

UN International Search and Rescue Advisory Group (INSARAG)

INSARAG is a body under UN OCHA

- ① Establishes international cooperation frameworks for earthquake response
- ② Develops global guidelines for search and rescue operations.
- ③ Manages the classification system for search and rescue teams.

WHO Emergency Medical Team (WHO EMT)

A team consisting of medical professionals, etc. in accordance with WHO standards, responsible for treating patients at disaster sites or in emergencies

Humanitarian Partnership Program

The Humanitarian Assistance Public-Private Partnership Program supports initiatives led by civil society organizations (CSOs) that provide essential aid to the most vulnerable populations in developing countries during emergencies and protracted crises. These initiatives include : Water, sanitation, and hygiene (WASH), Food security and nutrition, Public health and medical care, Livelihood support, Climate change adaptation and disaster risk reduction, Protection activities, Emergency rescue and relief efforts. The program is categorized into HDP-Nexus and RAPID Projects, depending on the type of humanitarian crisis response required.

► HDP-Nexus

The HDP-Nexus program supports vulnerable populations in developing countries, including refugees, internally displaced persons (IDPs), and host communities, who face chronic and recurrent humanitarian crises due to conflicts, civil wars, or prolonged famines and natural disasters. This program integrates humanitarian assistance, conflict and disaster prevention, peacebuilding, vulnerability reduction, resilience-building, and sustainable solutions into a comprehensive support framework. Projects are selected through a public proposal process one year before implementation, and successful proposals from civil society organizations are evaluated for funding. Each project operates for up to three years.

► RAPID (Responsive Actions and Partnership Initiative for Disaster)

RAPID is a newly established coordination platform for humanitarian assistance in the public and private sectors, launched in 2024. The initiative focuses on swift and timely responses in the aftermath of emergencies to help affected populations preserve dignity, meet basic needs, and alleviate suffering. In 2024, KOICA partnered with Shinhan Bank and domestic NGOs to jointly respond to acute food crises in Africa. As part of this effort, humanitarian assistance projects were implemented in five countries: Malawi, Madagascar, Burkina Faso, Zambia, and Angola.

Kenya Kalobeyei Integrated Drought Response and Management Project (2023–2024 / 0.9 million USD)

Background

Kalobeyei, located in northwestern Kenya near Turkana, is a dry region where 65% of the population faces poverty. Most refugees and host community members rely on livestock and agriculture for their livelihoods, but recurring droughts have worsened conditions, particularly after the East African drought in 2017. Severe droughts during dry seasons exacerbate water shortages, which in turn lower agricultural productivity, heighten food insecurity and malnutrition risks, and reduce household incomes. To address these challenges, the project aims to enhance the capacity of refugees and host communities in Kalobeyei to respond to droughts through an integrated approach.

KOICA's Role

Development of a safe water supply system	Capacity building for sustainable water resource management
Expansion of climate-resilient livestock farming technologies	Environmental improvement activities for climate-adaptive livestock farming

*Selected as an OECD TIPS Best Practice Case

- Increased access to safe and sustainable water sources
- Improved water accessibility through the development and rehabilitation of low-cost water sources
- Enhanced management of water infrastructure through education and activities by the Water Resource Management Committee
- Increased livestock productivity through climate-resilient livestock farming
- Strengthened household resilience through climate-resilient livestock farming education
- Restoration of grazing land through education and activities led by the Natural Resource Management Committee

Building and Operation of Temporary Settlement for Earthquake Affected People (2023–2024 / 8.13 million USD)

Background

In February 2023, 7.7 and 7.6 magnitude earthquakes struck Kahramanmaraş, Türkiye, followed by another 6.4 magnitude earthquake in Hatay. The consecutive quakes affected 11 regions, resulting in 50,000 casualties and 100,000 injuries. According to assessments, 2.7 million displaced people sought shelter in temporary camps and tents. Many children, adolescents, women, pregnant individuals, and nursing mothers were forced to live in unsafe conditions, exposing them to secondary risks such as gender-based violence. To aid the affected communities, three domestic NGOs formed a consortium to support the social reintegration of earthquake survivors and facilitate a swift recovery. As part of this effort, the "Korea-Türkiye Friendship Village" was established to serve as a temporary settlement, providing essential support and services.

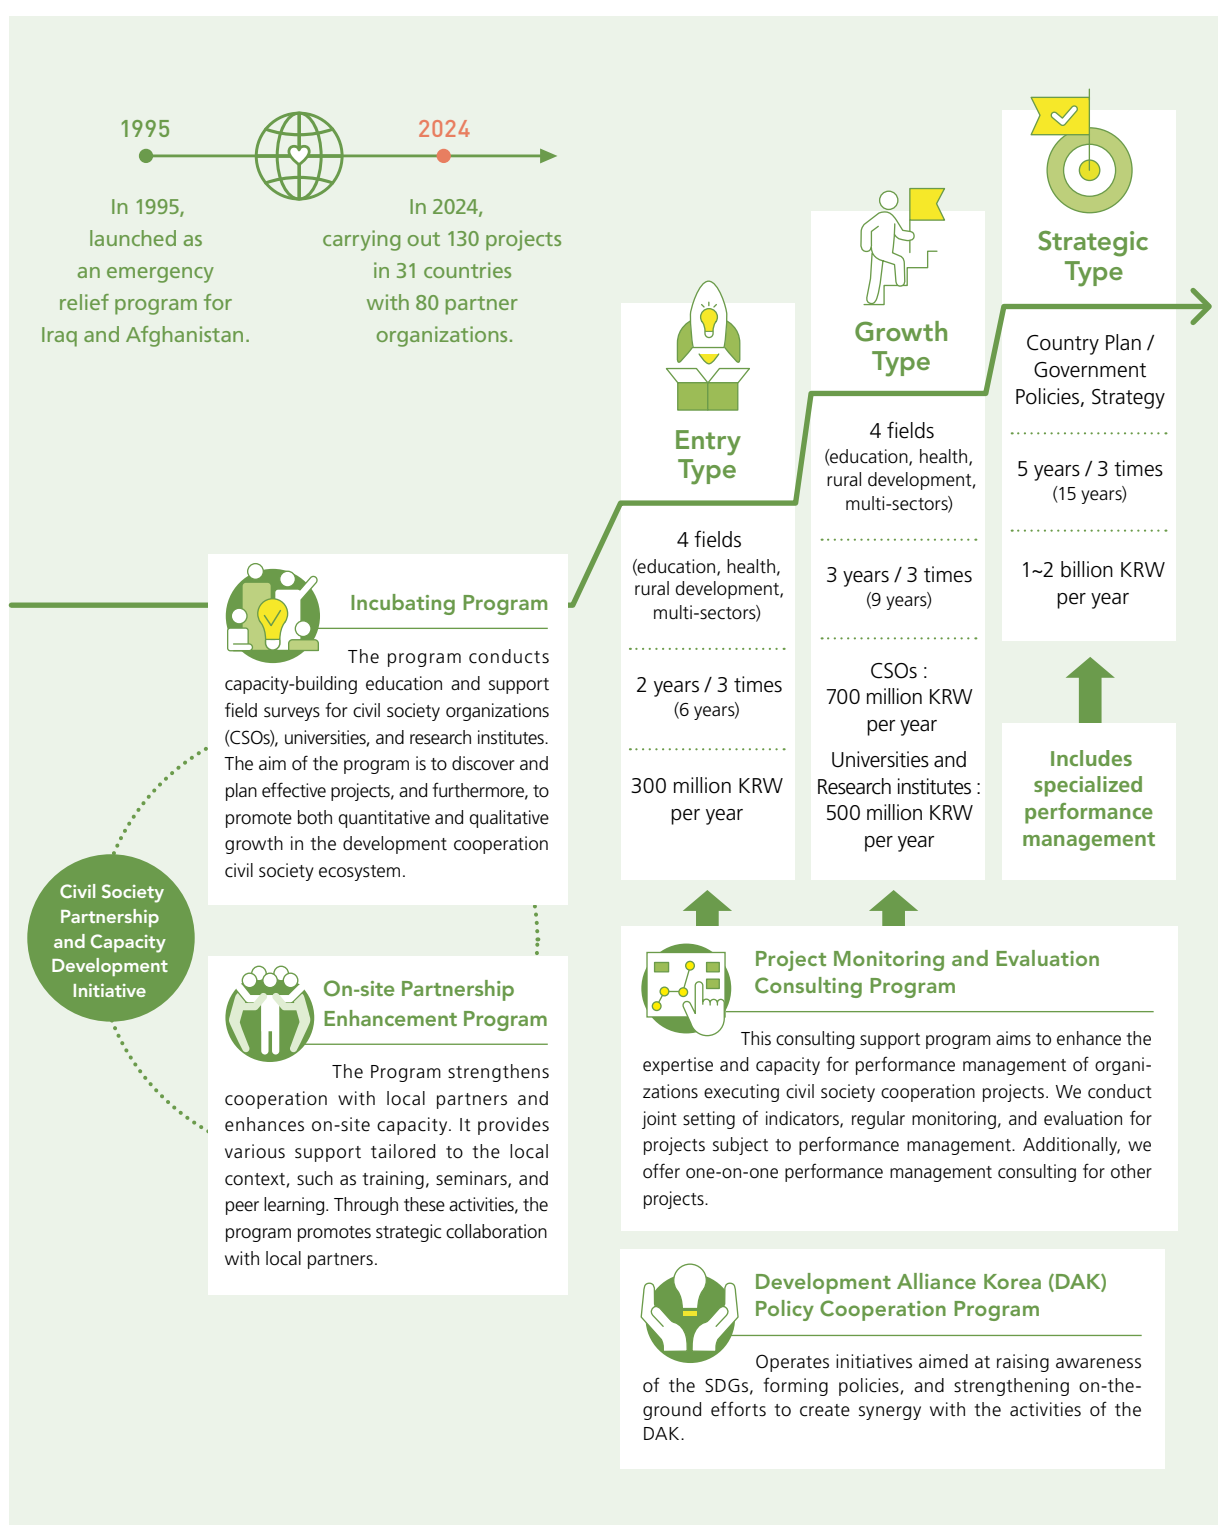

Key Achievements

- Construction of new container houses for displaced individuals and installation of WASH(Water, Sanitation, and Hygiene) facilities
- Implementation of social service programs within the settlement, including child protection, education, gender education, and psychological support
- Creation of public works jobs within the settlement and distribution of hygiene kits, nutrition kits, and essential relief supplies

07 Private Partnership Program

KOICA Civil Society Partnership Program fosters comprehensive partnerships between the government, civil society, businesses, and universities. The program leverages private human resources, intellectual resources, technology, business skills, and financial resources to contribute to sustainable development and poverty reduction. KOICA collaborates with partners to promote Civil Society Partnership Program aimed at improving the quality of life for residents in partner countries. The program is categorized into three types: Entry, Growth, and Strategic based on themes, scale, and duration.

08 Support Development Project

KOICA established ODA Education Center in 2010 to raise public awareness of international cooperation development and nurtures professionals in international cooperation development. First of all, KOICA provides online and offline education courses on various topics including recent international development cooperation trends and issues, sectors and regions, and ODA project management to contribute to fostering professionals to participate in ODA projects.

KOICA also educates elementary, middle, and high school students to become global citizens through a cooperative system with civil societies. The ODA exhibit halls help our future generations prepare to become global citizens by learning about universal values such as sustainable development, human rights, peace and sharing. Moreover, we work with local governments and local universities to expand ODA in communities, enhance awareness of ODA and strengthen the foundation. For more information, visit: oda.koica.go.kr

Expansion of the ODA Research and Knowledge Ecosystem

KOICA places a strong emphasis on ODA research and education to analyze key issues in international development cooperation. The ODA Research & Education Center plays a crucial role in leading national ODA policies and enhancing the effectiveness of KOICA projects through development cooperation policy research.

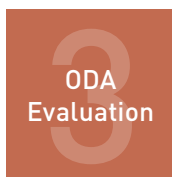

Additionally, it conducts various research projects, publishes reports, and facilitates knowledge-sharing on ODA issues in Korea and abroad. To strengthen global knowledge-sharing in development cooperation, KOICA annually hosts the 'Seoul ODA International Conference' and the 'Development Cooperation Forum' while also publishing a biannual international development cooperation journal. Furthermore, KOICA has formulated the '2025–2029 Mid-Term Knowledge Strategy' to expand and enhance research functions. This strategy focuses on three key objectives: Improving the quality and quantity of research, Expanding knowledge-sharing in development cooperation, Strengthening research partnerships and capacity-building.

KOICA Development Cooperation Knowledge Promotion System

Systematizing KOICA's Records and Information Management

KOICA strengthens social responsibility and transparency by systematically managing and preserving records and information produced in the course of implementing development cooperation projects. From records of dispatched miners and nurses in the 1960s and 1970s to materials from KOICA's early years, KOICA permanently preserves the historical memory of development cooperation. KOICA also contributes to knowledge dissemination by reviewing, reclassifying and disclosing records that were previously non-public. KOICA has established and operates a digital records management system and a database of non-electronic records, creating an environment in which records and information can be preserved and used in an integrated manner. By improving electronic searchability and usability, KOICA enhances its management efficiency and accountability.

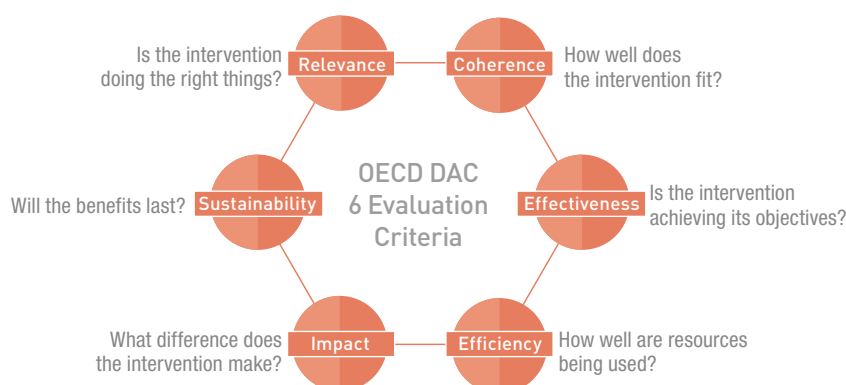

OECD DAC evaluation is a framework for objectively measuring whether official development assistance (ODA) projects have achieved their objectives and assessing their value. It reviews the performance of development cooperation projects against six evaluation criteria—relevance, coherence, effectiveness, efficiency, impact and sustainability—to support learning and accountability.

KOICA conducts evaluations based on the OECD DAC's six evaluation criteria. Through evaluation, KOICA meets its social accountability obligations for development cooperation projects and works to improve learning-based results.

Direction for KOICA Project Evaluations

Project evaluations are conducted to provide objective and independent assessments of project results, lessons learned and related matters, thereby supporting effective organizational learning. KOICA also discloses project evaluation results to fulfill its accountability to the public's right to know.

Based on the evaluation principles recommended by the OECD DAC, the KOICA Evaluation Office has established six principles—relevance, coherence, effectiveness, efficiency, impact and sustainability—and conducts evaluations accordingly.

To enhance fairness and transparency, KOICA complies with evaluation ethics guidelines, including the exclusion of project implementers from evaluator roles, implements guidelines on evaluation information disclosure, and operates the KOICA Project Evaluation Information Disclosure Platform.

For project evaluation quality review, the Department of KOICA Evaluation operates 'the Independent Evaluation Panel Quality Review Committee' to ensure expertise and reliability. It also ensures full application of the end-of-project evaluation grading system and holds workshops for feedback on evaluation results with diverse stakeholders, including partner countries, thereby strengthening the independence and reliability of evaluations.

* ODA Project Evaluation Information Disclosure Platform: koica.go.kr/sites/evaluation_kr

Implementation of KOICA Project Evaluation Improvement Tasks

As enhancing evaluation utility becomes increasingly important for decision-making on the management and implementation of development cooperation projects, KOICA has established the 2024–2028 KOICA Mid-Term Strategy for Project Evaluation. Under four strategic directions—establishing an evidence-based ODA project policy-making system, advancing the evaluation system, strengthening evaluation quality and feedback, and fostering the domestic ODA evaluation ecosystem—KOICA is implementing twelve strategic tasks.

The KOICA Mid-Term Strategy for Project Evaluation(2024–2028) sets out four key tasks:

▲establishing an evidence-based ODA project policy-making system, ▲laying the foundation for a strategic evaluation system, ▲strengthening evaluation quality and feedback, and ▲leading efforts to foster the domestic ODA evaluation ecosystem. Through these tasks, KOICA aims to improve project effectiveness by establishing an advanced evaluation system and creating a sound ecosystem for domestic ODA evaluation.

In this context, KOICA is expanding in-depth and strategic evaluations as well as impact evaluations, applying the grading system to end-of-project evaluation reports, and further specifying the guidelines of the Independent Evaluation Panel Quality Review Committee. KOICA is also strengthening evaluation training and continuing to hold evaluation events for key stakeholders, while planning and conducting meaningful ODA project evaluations and exploring ways to link evaluation with project decision-making.

Status of KOICA Project Evaluations — by Type

Evaluation Performance over the Last Three Years (2024–2026)

(Unit: number of evaluations)

Category		2024	2025	2026(Planned)	Total
Individual Project Evaluation	End-of-project Evaluation	24	31	**18	73
	Ex-post Evaluation	14	0	0	14
	Impact Evaluation	0	4	5	9
Strategic and In-Depth Evaluations	Country Program (CP) Evaluation	9	1	0	10
	Sector Strategy Evaluation	1	2	1	4
	Evaluation by Type	0	0	2	2
	Other Evaluations	1	0	0	1
Total		49	38	26	113

* Evaluation status is counted based on the year each evaluation commenced.

**The 2026 evaluations are based on the draft plan and are provisional figures excluding self-evaluations by other departments

KOICA works hard to strengthen the capability of partners and establish a cooperative ecosystem in procurement so that companies and people can participate in development cooperation projects smoothly. Therefore, we are building a foundation for our companies to join development cooperation markets home and abroad.

On top of that, we aim to become an advanced procurement organization that both people and partners are satisfied with by strengthening expertise, equity and transparency and establishing a development cooperation procurement platform. Moreover, our endless efforts to improve the evaluation system contribute to the fair and transparent operation of the technical evaluation system.

Development Cooperation Platform Function Enhancement and Entry Ladder Establishment

KOICA has its development cooperation procurement support center (Tel. 1588-0434) with specialist counselors. Our support center satisfies curiosity about participation and provides information about project performer selection systematically to help new companies enter into development cooperation markets. KOICA annually holds development cooperation projects presentation meeting to provide SMEs and partners home and abroad with opportunities to communicate with various programs considering KOICA projects participation.

Moreover, we have a procurement presentation meeting for companies that wish to participate in bidding to strengthen the information delivery system and capability of participants. We have also established an overseas ODA companies advancement support center. In the short term, the center encourages our companies to enter into developing countries and performs special educations for companies' capability enhancement to facilitate participation in overseas ODAs. It also promotes the establishment of the ecosystem of overseas ODAs through the vitalization of its market information. In a long term, we are planning to facilitate international biddings and establish a self-reliant domestic ODA ecosystem.

Compliance with international norms and expansion of opportunities for global ODAs participation

Since we joined OECD DAC in 2010, KOICA has complied with the recommendation of the international society on the expansion of development cooperation and provided aid to Korean companies for greater accessibility to the international development cooperation market. To this end, we have made a contract with DEVEX, an information agency for international development cooperation procurement, to provide information services about procurement in the international market, professional personnel, and international ODA market trends.

KOICA enhancement for development participation and support

KOICA selects project performers through open and competitive bidding and information surrounding bidding and contracts can be found in the KOICA Electronic Procurement System (nebid.koica.go.kr) or the Korea ON-LINE E-Procurement System (a public procurement information portal) or the KOICA homepage. KOICA aims to become a development cooperation platform. Therefore, we actively seek innovation and participatory development from the private sector to diversify participants' selection.

KOICA Exhibition Hall (Seongnam)

KOICA Exhibition Hall showcases various international issues, particularly those affecting developing countries, and highlights the efforts of the international community and Korea in addressing these challenges. Through exhibitions and educational programs, the hall aims to enhance public understanding of international development cooperation and promote a sustainable future.

Visitor Information

Operating hours Monday–Saturday, 10:00–18:00 (Last admission: 16:30)

*Open on the 2nd and 4th Saturdays of each month

Closed Sundays, holidays, and Saturdays (first, third, and fifth weeks of each month)

Admission Free

Guided Tours Available Monday–Saturday at 10:00, 11:00, 13:00, 14:00, 15:00, and 16:00

[Advance Reservation Required] *Visitors can explore the exhibition freely without prior reservation

KOICA World Friends Village (Yeongwol)

The KOICA World Friends Village is an interactive exhibition center where visitors can explore the history and daily lives of KOICA's partner countries. Through experiences of diverse cultures from around the world, visitors can develop a respectful attitude toward multiculturalism while learning about global issues affecting developing countries. The center aims to foster responsible and globally-minded individuals who can lead in the era of globalization.
